

COASTAL OPEN SPACE SYSTEM

06 June 2023

COMMUNITY STRATEGIC PLAN 2018-2028

ONE – CENTRAL COAST IS THE COMMUNITY STRATEGIC PLAN (CSP) FOR THE CENTRAL COAST LOCAL GOVERNMENT AREA

ONE – CENTRAL COAST DEFINES THE COMMUNITY'S VISION AND IS OUR ROADMAP FOR THE FUTURE

ONE – CENTRAL COAST BRINGS TOGETHER EXTENSIVE COMMUNITY FEEDBACK TO SET KEY DIRECTIONS AND PRIORITIES

One - Central Coast will shape and inform Council's business activities, future plans, services and expenditure. Where actions are the responsibility of other organisations, sectors and groups to deliver, Council will work with key partners to advocate on behalf of our community.

Ultimately, every one of us who live on the Central Coast has an opportunity and responsibility to create a sustainable future from which we can all benefit. Working together we can make a difference.

RESPONSIBLE

WE'RE A RESPONSIBLE COUNCIL AND COMMUNITY, COMMITTED TO BUILDING STRONG RELATIONSHIPS AND DELIVERING A GREAT CUSTOMER EXPERIENCE IN ALL OUR INTERACTIONS.

We value transparent and meaningful communication and use community feedback to drive strategic decision making and expenditure, particularly around the delivery of essential infrastructure projects that increase the safety, liveability and sustainability of our region. We're taking a strategic approach to ensure our planning and development processes are sustainable and accessible and are designed to preserve the unique character of the coast.

 **Good governance and great partnerships**

G2 Engage and communicate openly and honestly with the community to build a relationship based on trust, transparency, respect and use community participation and feedback to inform decision making

There are 5 themes, 12 focus areas and 48 objectives

COMMUNITY STRATEGIC PLAN 2018-2028 FRAMEWORK

All council reports contained within the Business Paper are now aligned to the Community Strategic Plan. Each report will contain a cross reference to a Theme, Focus Area and Objective within the framework of the Plan.

Meeting Notice

**The Coastal Open Space System
of Central Coast Council
will be held
Online,
on Tuesday 6 June 2023 at 2:00pm,
for the transaction of the business listed below:**

1 Procedural Items

- 1.1 Introduction: Welcome, Acknowledgement of Country, Apologies, Disclosure of Interest..... 4
- 1.2 Previous business: Confirmation of minutes, review action log 5

2 Reports

- 2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation17
- 2.2 Update on Davistown Wetlands Acquisition Fund and the draft Central Coast Conservation Fund Policy42
- 2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149)43
- 2.4 Update on visit to Wambina (Action 158).....56
- 2.5 Update from External Representatives (Standing Agenda Item)61
- 2.6 Update from Community Representatives (Standing Agenda Item).....62
- 2.7 General Business.....63

Luke Sulkowski
Chairperson

1.1 INTRODUCTION: WELCOME, ACKNOWLEDGEMENT OF COUNTRY, APOLOGIES, DISCLOSURE OF INTEREST

Chairperson – Luke Sulkowski

Welcome, Acknowledgement of Country, Receipt of Apologies

We acknowledge the Traditional Custodians of the land on which we live, work and play. We pay our respects to Elders, past, present and emerging and recognise their continued connection to these lands and waterways.

We acknowledge our shared responsibility to care for and protect our place and people.

1.2 PREVIOUS BUSINESS: CONFIRMATION OF MINUTES, REVIEW ACTION LOG

Luke Sulkowski
Chairperson

There were insufficient voting non-Councillor representatives present for the meeting, so quorum could not be achieved in accordance with Section Three of the Terms of Reference.

The Chairperson, Luke Sulkowski, advised those present that in the absence of a quorum the meeting could not continue and that another more suitable time would be arranged with invitations at a later date.

PROCEDURAL ITEMS

1.1 Introduction: Welcome, Acknowledgement of Country, Apologies, Disclosure of Interest

The Chairperson, declared the meeting open at 3:01PM

The Chair read an Acknowledgement of Country statement.

Apologies received were noted.

The Chair called for any disclosures of interest. No disclosures were received

REPORTS

2.1 Davistown Wetlands Acquisition Fund

Recommendation: That the committee have reviewed the presentation of the Central Coast Conservation Fund Policy Development and provide feedback.

Presentation by: Larry Melican

Background provided by Luke Sulkowski:

Attendees flagged that there may be alternative opportunities to fund the acquisition of the wetlands other than through Council. The chair advised that he understood that the negotiation for the purchase of the Davistown Wetlands did not fail due to not enough money, but that purchase was being pursued in accordance with Council's Policy for Land Acquisition, and that independent valuations for the land, which Council's offers were based on, were not accepted by the vendor. Ultimately the vendors expectations for sale price of the land did not align with how much Council was prepared to pay.

Council staff advised the Committee that if the Davistown Wetlands Acquisition funds were to go into the new proposed Conservation fund that theoretically there will still be an opportunity for the money to be spent on the Davistown Wetlands, but that application of that fund towards specific projects, tasks and actions, would ultimately be prioritised based on net benefit regardless of location within the LGA. This would include the approach taken in regards to Council's Environmental Land Acquisition Program (ELAP).

There has been a meeting with the Davistown Progress Association to obtain their input.

Luke Sulkowski (Unit Manager Environment Management) asked the following questions to the group to gain their feedback:

1. **What should the funds be spent on?**
2. **Should the funds stay restricted only for Davistown or should it be spent more productively and go into the conservation fund?**

Minutes of the Coastal Open Space System of Council 27 March 2023 contd

Gary Chestnut (non-voting member) requested for the interest generated by the Conservation Fund to be quarantined within it, and not the general fund. Also requested that the funds remain separate in its own account.

The committee agreed that alternate application of the funds within Davistown could be for such projects as habitat enhancement and protection for the Bush Stone Curlew and other threatened species in the area. It was understood that Council staff had engaged an ecologist to undertake further studies in regards to conflicts between off leash dog exercise areas and wildlife habitat at Pippi Point, and pending the outcome of those studies and further Council decisions in relation to the site, that the funds may be applied at that location for more beneficial conservation outcomes.

Some other feedback from the Committee members included:

- Would like to see the funds used at Davistown on other Conservation Outcomes where possible. Stating that it would be a good environmental use and it would keep the people of Davistown happy.
- Other advice also said that they would be happy to have the funds go into a general conservation fund.
- Another suggestion was that funds could be used for Wetlands within a certain radius, feels it is too restricted just using Davistown. Possible future developers may think it is only for Davistown.

Action: The Chairperson requested any additional feedback to be sent to Advisory group inbox by 11 April 2023.

The Meeting concluded at 3.53pm

Item No: 2.1
Title: Update on Biodiversity Strategy & Land Acquisition & Prioritisation
Department: Environment and Planning

6 June 2023 Coastal Open Space System

Reference: F2018/00099-002 - D15662339
Author: Larry Melican, Section Manager Natural Assets and Biodiversity
Manager: Luke Sulkowski, Unit Manager Environmental Management
Executive: Alice Howe, Director Environment and Planning

Recommendation

That the information be noted.

Report purpose

To provide information to the Coastal Open Space System (COSS) Committee on projects related to the *Central Coast Council Biodiversity Strategy* that was adopted by Council on 28 September 2020.

Executive Summary

This report to the COSS Committee provides information on the following projects:

- Establishment of Biodiversity Stewardship Agreements on four Council reserves
- Management of the loggerhead sea turtle nest at Shelly Beach
- The outcomes of the little tern breeding season at Karagi Point, The Entrance North.

Background

Council adopted that *Central Coast Council Biodiversity Strategy* on 28 September 2020. Of the six themes of the Biodiversity Strategy, the projects outlined in this report align closely with:

Theme 1: Planning and Managing Biodiversity in Council's Natural Areas
Theme 3: Promoting community appreciation and participation in biodiversity conservation

Current Status

Council has responsibilities as land managers for the management of biodiversity including threatened species. Council participates in the NSW Government's Biodiversity Offset Scheme that provides funding for managing land protected under a Biodiversity Stewardship Agreement. Council also undertakes on ground works, often in conjunction with NSW

2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation (contd)

Government stakeholders, local experts and the community. The report provides a status report on biodiversity stewardship agreements and two threatened species being managed by Council.

Report

Biodiversity stewardship agreements over Council reserves at Tumbi Umbi and Blue Haven

The *Biodiversity Conservation Act 2016* sets out a mandatory biodiversity offset scheme under which proponents of developments or land clearing activities generate a credit obligation that must be retired to offset their activity. Landholders who establish a biodiversity stewardship site on their land generate credits that can be sold to developers who require those particular credits. Biodiversity Stewardship Agreements provide funds in perpetuity to implement a land management action plan to restore and maintain biodiversity values.

On 22 November 2022 Council resolved:

1. *That Council authorise the Chief Executive Officer to enter into proposed Biodiversity Stewardship Agreements with the NSW Biodiversity Conservation Trust over the lots detailed in Appendix 1 that make up the Blue Haven Wetland Reserve and the Tumbi Umbi Wetland.*
2. *That Council authorise the Chief Executive Officer to negotiate and proceed with the sale of biodiversity credits that are generated by the two Biodiversity Stewardship Agreements.*
3. *That Council note that the sale of biodiversity credits will fund the ongoing management of the land that they apply to for conservation purposes, and that this land will remain in Council ownership.*
4. *That a report be prepared for Council following the sale of any biodiversity credits associated with either of these Biodiversity Stewardship Agreements.*

The reserves that are the subject of this proposal are in Blue Haven and Tumbi Umbi and are:

- R0391 – Blue Haven Reserve
- R0314 – Tumbi Umbi Wetland South
- R0315 – Sir Joseph Banks Bushland
- R0419 – Eric Malouf Close Reserve
- R0428 – Tumbi Umbi Wetland North
- R0429 – Tumbi Umbi Wetland Beaverdale

Two biodiversity assessments have been undertaken that identify the vegetation communities on the reserves and have calculated the ecosystem and species credits generated by those communities. Two detailed management plans have been prepared for

2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation (contd)

the reserves, including the 20-year costs for implementation. The agreements are drafted and under final review prior to execution by the Chief Executive Officer.

Proposed Biodiversity Stewardship Agreements on four Council reserves

Preliminary assessments are being undertaken on four COSS reserves. If considered viable, a report to Council will provide approval to enter into agreements. The reserves are known as:

- R0057/R0087 Tumbi Road Reserve/Carbeen Road Reserve;
- R0096 Wells Morella Close Reserve; and
- R0101 Kenmare Road Reserve.

Loggerhead sea turtle nest at Shelly Beach

In mid-January members of the community reported turtle tracks on Shelly Beach. The community members contacted local wildlife carers who in turn contacted NSW Turtle Watch. National Parks and Wildlife Service (NPWS) officers attended the site and confirmed that the tracks were the nesting crawl of the loggerhead sea turtle (*Caretta caretta*). The NPWS officers confirmed that a clutch of eggs had been laid near the toe of the dunes above high tide mark. The Shelly Beach site is the most southerly record of a loggerhead nest.

NPWS is the lead agency in monitoring and protection of the nesting site, and supporting the successful hatching of the eggs, but contacted Council for support as the land manager of the beach. Working together, Central Coast Council, National Parks and Wildlife Service, NSW Turtle Watch, members of the Darkinjung Local Aboriginal Land Council and volunteers formed a working group to best manage the nest of this endangered species.

Management of the site has included establishing an exclusion zone and fencing, installing signage and fox monitoring and control. Support from the beach users and broader community was seen as being very important, including to minimise inadvertent damage to the turtle nest. Council has worked with the other stakeholder groups on social media posts and media releases. A high level of interest in the turtle nest has been expressed by members of the community.

Given that the loggerhead turtle nest is southward of its usual breeding zone, there was concern that the sand at Shelly Beach will not naturally retain the temperate required for incubation.

Sea turtle nests need an average sand temperature of above approximately 25 degrees to allow the hatchlings to develop. A temperature data logger had been placed near the nest at the same depth to allow the temperatures to be monitored. Turtle eggs cannot be moved in the first three to four weeks after being laid, as the embryos are very sensitive to movement. When the temperature of the nest dropped below 25 degrees, black sand was placed over the top of the nest to increase heat absorption and attempt to increase the temperature. This was successful raising the temperature of the nest by approximately 1 degree.

2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation (contd)

The contingency plan identified that should the sand temperature fall below the optimal temperature was to transfer the eggs to an incubator at Taronga Zoo.

Loggerhead sea turtles will generally lay approximately 120 eggs per clutch and can generally lay around 1 to 5 clutches of eggs per season. This sea turtle usually lays its nests in tropical and sub-tropical beaches of Queensland – they are usually not found this far south.

Sea turtles have temperature dependant sex determination, where the sex of the hatchling is determined in the middle third of incubation. Warmer temperatures produce females and cooler temperatures produce males. Climate change is resulting in the generalised warming of nests, potentially producing more females. Nests laid in more southern latitudes, such as this one and others in NSW, are important as they are likely to produce male hatchlings.

Loggerhead turtles face many anthropogenic threats including climate change, ingestion of marine debris and by-catch in international fishing and since the mid 1970's there has been a general decline in the size of the annual nesting population at all monitored Turtle rookeries in eastern Australia, making it more important that this nest is saved, since every sea turtle nest might contain 50 to 150 eggs.

Sea turtles also possess a trait called natal philopatry, where they return to the beach where they hatch to lay in the future. This means that if this nest is successful, any female hatchlings that emerge may return in 30 or so years to nest on this beach! This may be an important adaptive process to combat changing climates.

On 29 March 2023 in response to cooling conditions the loggerhead turtle nest chamber was located and carefully excavated by hand and placed into waiting incubators to be delivered to Taronga Zoo. Of the 136 eggs located only 4 were assessed as being non-viable, with the remaining 132 presumed to be viable.

Ninety-three loggerhead turtle hatchlings that had hatched in the incubators at Taronga Zoo were released at Shelly Beach on 9 April 2023 accompanied by a smoking ceremony led by the Darkinjung Local Aboriginal Council. Of the 93 hatchlings released 60 successfully made it into the ocean, with the remaining 33 being washed back to the shore and subsequently taken back to Taronga Zoo. A second release of 63 hatchlings (including the 33 washbacks) occurred on 12 April 2023. All of these secondary releases were successful.

Nine eggs failed post excavation (3 infertile, and 6 advanced dead embryos). Overall however there was still a 90.4% (123 out of 136) success rate from the original clutch of eggs.

Unfortunately, most turtle hatchlings do not survive with less than 5 expected to make it to adulthood. The collaboration between the community, government and volunteers at Shelly Beach has helped those hatchlings make the initial steps in their life journeys.

2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation (contd)

Little Tern breeding site at Karagi Point, The Entrance North

The little tern breeding season commenced at Karagi Point, The Entrance North in early November and the site was abandoned by late January.

After two successive record-breaking seasons there was anticipation of an exceptional 2022/23 breeding season and at one point were predicting up to 150 fledged birds. Unfortunately, due part to predation by silver gulls, only 31 chicks were confirmed to have fledged. This was down from 56 and 96 in the two previous years, and while numbers are still to be confirmed, it appears that the Karagi Point site was second in terms of chicks fledged in NSW this year, with the Wollumboola Lake site in The Shoalhaven recording 55 fledglings.

From 2000 to 2020 an average of only 11.5 chicks fledged per season at Karagi Point. This included 12 seasons where nesting either wasn't attempted or was deemed a complete failure due to predation or inundation.

The average number of fledged chicks over the last three breeding seasons is 61, which validates the current approach taken by Council in managing the site.

This success is likely in part due to management including:

- habitat enhancement works to reduce the threat of inundation
- installation of secure fencing that excludes people and dogs
- the development of interpretive and regulatory signage
- a program of fox control
- regular rubbish collection to reduce the potential for food scraps that may attract avian/terrestrial predators
- a program of weekly monitoring
- effective community engagement and education strategy to raise awareness of the endangered Little Tern and the importance of Karagi Point.

Consultation

Consultation was undertaken with the internal stakeholders on the proposed establishment of the biodiversity stewardship agreements to ensure that there were no potential conflicts with identified in the reserves, such as critical infrastructure that requires on-going maintenance. Internal consultation was also undertaken on the potential requirements for the credits generated from the two sites. No conflicts were identified, and no credit requirements were identified.

2.1 Update on Biodiversity Strategy & Land Acquisition & Prioritisation (contd)

Community consultation on the *Central Coast Council Biodiversity Strategy* was undertaken in 2019. Action 1.4.2 is to establish conservation agreements, such as Biodiversity Stewardship Agreements, to improve the long-term protection status of Council's natural areas.

Financial Considerations

At its meeting held 19 October 2020, Council resolved the following:

1108/20 That any motions put before Council for the remainder of this term of Council that have financial implications require the Chief Executive Officer to provide a report on how those additional costs will be met.

The following statement is provided in response to this resolution of Council.

The recommendations of this report do not have any material financial implications for Council.

Biodiversity Strategy Presentation

6 June 2023

Biodiversity Strategy Report

- Biodiversity Stewardship Agreements at 4 COSS reserves
- Little tern breeding at Karagi Point, The Entrance North
- Loggerhead sea turtle nest at Shelly Beach

Final stages: Biodiversity Stewardship Agreements

Council considered a report titled Biodiversity Stewardship Agreements in **Blue Haven** and **Tumbi Umbi** on 22 November 2022 and resolved:

1. That Council authorise the Chief Executive Officer to enter into proposed Biodiversity Stewardship Agreements with the NSW Biodiversity Conservation Trust over the lots detailed in Appendix 1 that make up the Blue Haven Wetland Reserve and the Tumbi Umbi Wetland.
2. That Council authorise the Chief Executive Officer to negotiate and proceed with the sale of biodiversity credits that are generated by the two Biodiversity Stewardship Agreements.
3. That Council note that the sale of biodiversity credits will fund the ongoing management of the land that they apply to for conservation purposes, and that this land will remain in Council ownership.
4. That a report be prepared for Council following the sale of any biodiversity credits associated with either of these Biodiversity Stewardship Agreements

Agreement being drafted →

centralcoast

Biodiversity Stewardship Agreements

- The *Biodiversity Conservation Act 2016* sets out a mandatory biodiversity offset scheme under which proponents of developments or land clearing activities generate a credit obligation that must be retired to offset their activity. Landholders who establish a biodiversity stewardship site on their land generate credits that can be sold to developers who require those particular credits
- Biodiversity Stewardship Agreements provide funds in perpetuity to implement a land management action plan to restore and maintain biodiversity values

Proposed: Biodiversity Stewardship Agreements

- Preliminary assessments are being undertaken on 4 reserves. If considered viable, a report to Council will provide approval to enter into agreements
- R0057/R0087 Tumbi Road Reserve/Carbeen Road Reserve and R0096/R0101 Wells Morella Close Reserve/Kenmare Road Reserve
- Option: a Credit Supply Contract with the Credit Supply Taskforce. The CST would buy all of the credits and meet the Total Fund Deposit so that Council can immediately start to receive land management payments

Little Tern Fledging Success: 2000 - 2023

Loggerhead sea turtle nest at Shelly Beach

- In mid-January 23 walkers at Shelly Beach saw tracks in the sand they suspected to be a turtle.
- This was confirmed along the presence of eggs near the dunes.
- This is one of the southern-most loggerhead nests on record!
- Council has worked with a stakeholder group to monitor and protect the nest site.
- Sand temperate is crucial for successful hatching of the eggs and for the gender of the babies.

Worldwide distribution loggerhead sea turtles

Fence and signs Shelly Beach

Release of hatchlings at Shelly Beach

- 136 eggs were carefully excavated on 29 March 2023 in response to declining sand temperature
- Placed into incubators and taken to Taronga Zoo where 93 eggs successfully hatched
- Release occur on 9 April 2023 with 60 heading off it into the ocean
- The 33 that didn't brave the water were taken back to Taronga Zoo
- The second release occurred on 12 April 2023 when all hatchlings took to the water.

Thanks to Team Turtle

Item No: 2.3
Title: Update on proposed trial of COSS in the former Wyong LGA (Action 149)
Department: Environment and Planning

6 June 2023 Coastal Open Space System

Reference: F2018/00099-002 - D15662372
Author: Larry Melican, Section Manager Natural Assets and Biodiversity
Manager: Luke Sulkowski, Unit Manager Environmental Management
Executive: Alice Howe, Director Environment and Planning

Recommendation

- 1. That the information be noted***
- 2. That based on the discussions held between Council staff and Gary Chestnut tabled in this report, and presented at this meeting, that the COSS Committee provide feedback on the discussion points addressed in order to determine a suitable way to proceed***

Report purpose

To provide the COSS Committee with an update of the meetings held between Council Officers and Gary Chestnut about the potential to apply the COSS name to a reserve or reserves in the former Wyong LGA on a trial basis.

To request feedback from the COSS Committee on the parameters for assessing the outcomes of the trial, the data required to demonstrate the outcomes of the trial, the thresholds for achievement/non-achievement of each of the parameters, the management actions required to support the trial, the resources required to implement the management actions, the length of time required to assess the effectiveness of the trial and any information relevant to the trial.

Executive Summary

The COSS Committee has discussed the potential to expand the COSS into the former Wyong Local Government Area (LGA) at various times over the past two years. The COSS Committee has been reminded, on these occasions, that bushland reserves and other conservation lands do exist in the former Wyong LGA, they are just not branded as COSS or under any other moniker. On 2 March 2021 the COSS Committee considered Item 9 titled Findings of COSS Report undertaken by the Community Environment Network (CEN).

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

In response to Action Item 149 from the COSS Meeting of 13 December 2021, meetings were held with Gary Chestnut as per Action Item 149 on 8 December 2022 and 27 April 2023.

Feedback is sought from the COSS Committee on the parameters for assessing the outcomes of the trial, the data required to demonstrate the outcomes of the trial, the thresholds for achievement/non-achievement of each of the parameters, the management actions required to support the trial, the resources required to implement the management actions, the length of time required to assess the effectiveness of the trial and any information relevant to a potential trial.

Background

The COSS Committee has discussed the potential to expand the COSS at various times over the past two years.

On 2 March 2021, during discussion on Item 9 titled Findings of COSS Report, Jackie Pearson from the CEN provided the COSS Committee with a presentation on the report titled "Strengths, Weaknesses, Challenges and Opportunities of the Coastal Open Space System (COSS)" which had the following objectives:

- To explore the strengths, weaknesses, challenges and opportunities of the COSS
- To present a recommendation on the possibility of expanding the COSS into the former Wyong local government area.
- To present a recommendation on establishment of a Regional Park for the existing COSS.

The relevant action arising following the presentation was:

Action 127: Gary Chestnut to liaise with Luke Sulkowski to clarify the points of difference in the COSS report compared to the Biodiversity Strategy.

Action Item 127 of 2 March 2021 was updated on 9 June 2021 to reflect the actions taken:

A meeting was held, and the differences of interpretation were acknowledged. It was noted that the COSS report and Biodiversity Strategy were drafted concurrently. Gary gave an undertaking that he would review the recommendations in the COSS report with actions that are in the Biodiversity Strategy. Gary to present a combined report on Council's Biodiversity Strategy and future recommendations from the COSS report.

As part of the Action Log update in Agenda Item 1 at the COSS Meeting of 21 September 2021 a new action (no. 136) was recorded in the minutes. Action item 127 was marked as complete.

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

Action 136: The Comparison undertaken by CEN of the COSS Report and Council's Biodiversity Strategy to be circulated to Committee Members. Unit Manager Environmental Management to investigate the option of an Extraordinary Meeting to discuss the report.

On 13 December 2021 the COSS Committee considered Item 8 titled 'Comparison between CEN COSS Report and Central Coast Council Biodiversity Strategy'. A decision was made to discuss the item at the ordinary meeting on 13 December 2021 rather than hold an extraordinary meeting for the item. Action 136 was marked as complete in the Action Log, with a new action (149) being recorded:

Action 149: Staff to arrange a further meeting with Gary Chestnut with a view to identifying some existing natural assets and other conservation reserves in the former Wyong LGA that may be considered for trial under the COSS branding and to identify likely tasks required in order to proceed with such a project.

This report is prepared in response to Action Item 149.

Current Status

In response to Action Item 149 from the COSS Meeting of 13 December 2021 meetings were held with Gary Chestnut as per Action Item 149 on 8 December 2022 and 27 April 2023. The Council representatives at the two meetings were Luke Sulkowski, Unit Manager, Environmental Management Unit, Larry Melican, Section Manager Natural Assets and Biodiversity and Rochelle Lawson, Senior Ecologist.

Report

The two meetings held on 8 December 2022 and 27 April 2023 were open and constructive. The following summarises the points of discussion covered:

Key advantages of COSS brand

- The COSS brand offers a level of political or reputation protection, rather than legislative protection.
- The use of the COSS brand may be a simpler way for the community to understand and talk about environmental protection, rather than having detailed knowledge of environmental legislation and ecology.
- The former Gosford City Council received government grants to purchase land. Political kudos resulted from federal government grants, which were especially able to be applied for or lobbied for because of the named system.

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

Potential risks associated with applying the COSS brand to other reserves

- The COSS brand does not provide legislative protection for the land, nor a legally binding commitment to manage the land for biodiversity. Community classification of land provides a level of legislative protection under the Local Government Act.
- The COSS branding may not be quite as familiar and well embraced in the north of the LGA. The pilot or broader reserve branding could change that, but the benefits would need to be better understood first.
- Stronger legislative protection of environmentally important land is available under the Biodiversity Conservation Act through establishing Biodiversity Stewardship Agreements or Conservation Agreements. Biodiversity Stewardship Agreements provide an in-perpetuity source of funds for management and include a legally binding commitment to manage the land for its biodiversity values.
- The name itself may present potential disadvantages as not all of the land is coastal, and it is not actually open space (in the sense of open parklands, or having the primary purpose of recreation), but is primarily intended to support native vegetation, biodiversity and habitats.
- If we want to draw attention to bushland reserves, the brand could be applied to areas with established recreational opportunities (e.g. formalised walking trails or lookout opportunities). This would potentially allow for promotion of the environment and compatible nature-based recreation. There are risks in advertising the location of environmental land which have no recreational infrastructure and are held almost exclusively for conservation purposes.
- Naming a reserve COSS may increase expectations that the site will be more intensively managed.

Strategic documents that refer to expansion of the COSS

- Community Strategic Plan - Objective F2: Promote greening and ensure the wellbeing of communities through the protection of local bushland, urban trees, tree canopies and expansion of the COSS.
- Central Coast Regional Plan 2041
 - Strategy 6.3: Local strategic planning should consider opportunities to strengthen the Coastal Open Space System by expanding its links and extending new corridors to balance growth in the north of the region and protect the network of natural areas across the region.

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

- Planning Priority 4: Protect vegetated ridgelines and enhance the enjoyment of conservation areas for passive recreation activities compatible with the natural environment
 - Council can strengthen connections between the natural areas of the COSS and lesser vegetated areas within the urban environment by implementing the Central Coast Greener Places Strategy, including planting trees on private land or around schools, health facilities, parks and golf courses.
- Central Lakes Precinct
 - Planning Priority 4: Enhance the blue and green grid
 - Expanding the Central Coast's COSS into the Central Lakes District will secure biodiversity corridors and high environmental value areas to maintain viability.
 - Any development in new growth areas will need to maintain the integrity of the biodiversity corridors and not compromise the movement of wildlife between the mountains and the ocean. This will reinforce the landscape and visual setting for urban development.

Planning Priority 4 for the Central Lakes Precinct is about reserving high environmental value land for the on-going viability of biodiversity in the precinct, rather than applying the COSS name to existing natural reserves.

Expanding the COSS within the existing footprint in the former Gosford LGA

The COSS could be expanded by acquiring identified proposed COSS properties and by reviewing the existing COSS boundary to include properties that support native vegetation which have not been identified on the proposed COSS site list. Council staff are aware of a number of private properties that support bushland in the former Gosford LGA that are not identified for future voluntary acquisition and may have values consistent with the COSS.

Potential Trial location for COSS in the former Wyong LGA

- The transfer of 94.48 hectares of land in 'Precinct 7A' land at Warnervale to Council occurred on 21 October 2022 and was reported to the COSS Committee on 6 December 2022 (see Attachment 1).
- The COSS criteria would need to be applied to proposed reserve(s) for consistency, and the reserves would need to achieve a sufficiently high score that exceeds the 'cut off', which was the process used in the review of the COSS during 2006.

What are the potential indicators of success of a trial in the former Wyong LGA?

The following indicators were put forward for consideration (on the basis that we can demonstrate behavioural and other change resulting from the proposed 'COSS' branding)

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

- Increased community understanding and value of the local natural environment?
- Increased community understanding of the threats to biodiversity and the actions that individuals and groups can take to reduce the threats?
- Active community engagement in environmental volunteering?
- A reduction and reversals of encroachments from neighbouring properties into public areas managed for nature conservation?
- A reduction in unauthorised activities on land managed for nature conservation – vegetation lopping/removal, firewood collection, bush rock collection, reptile and other animal poaching, track construction etc.?
- Increased populations numbers of key animal, plant and/or other populations of biota?
- Increased use of the land by the community for activities consistent with biodiversity conservation?

What data needs to be collected to determine the success of the trial?

- This very much depends on what the defined indicator(s) of success are.
- How long would data need to be collected for to be able to provide an evidence-based understanding of trends with biodiversity, as well as community and Council behaviours and activities?
- What resources are required to collect the required data?
- How do we ensure and preserve data integrity in regard to the trial (i.e. to produce an objective results to guide further direction)

Management actions to support the trial

- Budgets and staff time are both already limited, and a trial of applying the COSS name to other reserve(s) and the associated actions, which may include promotional activities, of the site require staff and budget resources.
- Management actions applied to the trial reserve would need to be consistent with those of similar COSS reserves.

Consultation

Meetings were held with Gary Chestnut as per Action Item 149 on 8 December 2022 and 27 April 2023. The Council representatives at the two meetings were Luke Sulkowski, Unit Manager, Environmental Management Unit, Larry Melican, Section Manager Natural Assets and Biodiversity and Rochelle Lawson, Senior Ecologist.

Feedback is sought from the COSS Committee on the parameters for assessing the outcomes of the trial, the data required to demonstrate the outcomes of the trial, the thresholds for achievement/non-achievement of each of the parameters, the management actions required to support the trial, the resources required to implement the management actions, the length of time required to assess the effectiveness of the trial and any information relevant to a potential trial.

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

Financial Considerations

At its meeting held 19 October 2020, Council resolved the following:

1108/20 That any motions put before Council for the remainder of this term of Council that have financial implications require the Chief Executive Officer to provide a report on how those additional costs will be met.

The following statement is provided in response to this resolution of Council.

The recommendations of the report do not have a financial impact on Council's General Fund. Implementations of the outcomes of the discussion around a trial may have resource implications, which would need to be considered against Council's other priorities.

Link to Community Strategic Plan

Theme 3: Green

Choose Focus Area

G-F2: Promote greening and the wellbeing of communities through the protection of local bushland, urban trees, and expansion of the Coastal Open Space System (COSS).

Risk Management

The recommendations of this report are not considered to present a potential risk to Council.

Options

The recommendations present the opportunity for the COSS Committee to provide feedback and be active in defining a robust way of assessing the effectiveness of and the resourcing of a potential COSS naming trial in the former Wyong LGA. **Recommended.**

That only Council officers define the detail of the assessment and operation of a potential COSS naming trial in the former Wyong LGA. **Not recommended since the COSS Committee's involvement and support of the process is important for the trial.**

That a trial proceed without any assessment criteria and data collection to assess its outcomes. **Not recommended as there will be no way to undertake an evidence-based assessment of a potential trial.**

2.3 Update on proposed trial of COSS in the former Wyong LGA (Action 149) (contd)

Land Transfer at Warnervale

Former Precinct 7A of North Wyong
Shire Structure Plan

Former Precinct 7A Land at Warnervale

- Transfer of 145 hectares of flood prone land in the Warnervale Floodplain
- Stage 1 transfer (Lot 704 DP 1275094) of 94.48 ha occurred on 21 Oct 22
- Stage 2 of proposed Lot 711 to occur following subdivision
- Total area approx. 145 hectares
- Sec 7.11 developer contribution for rehabilitation works

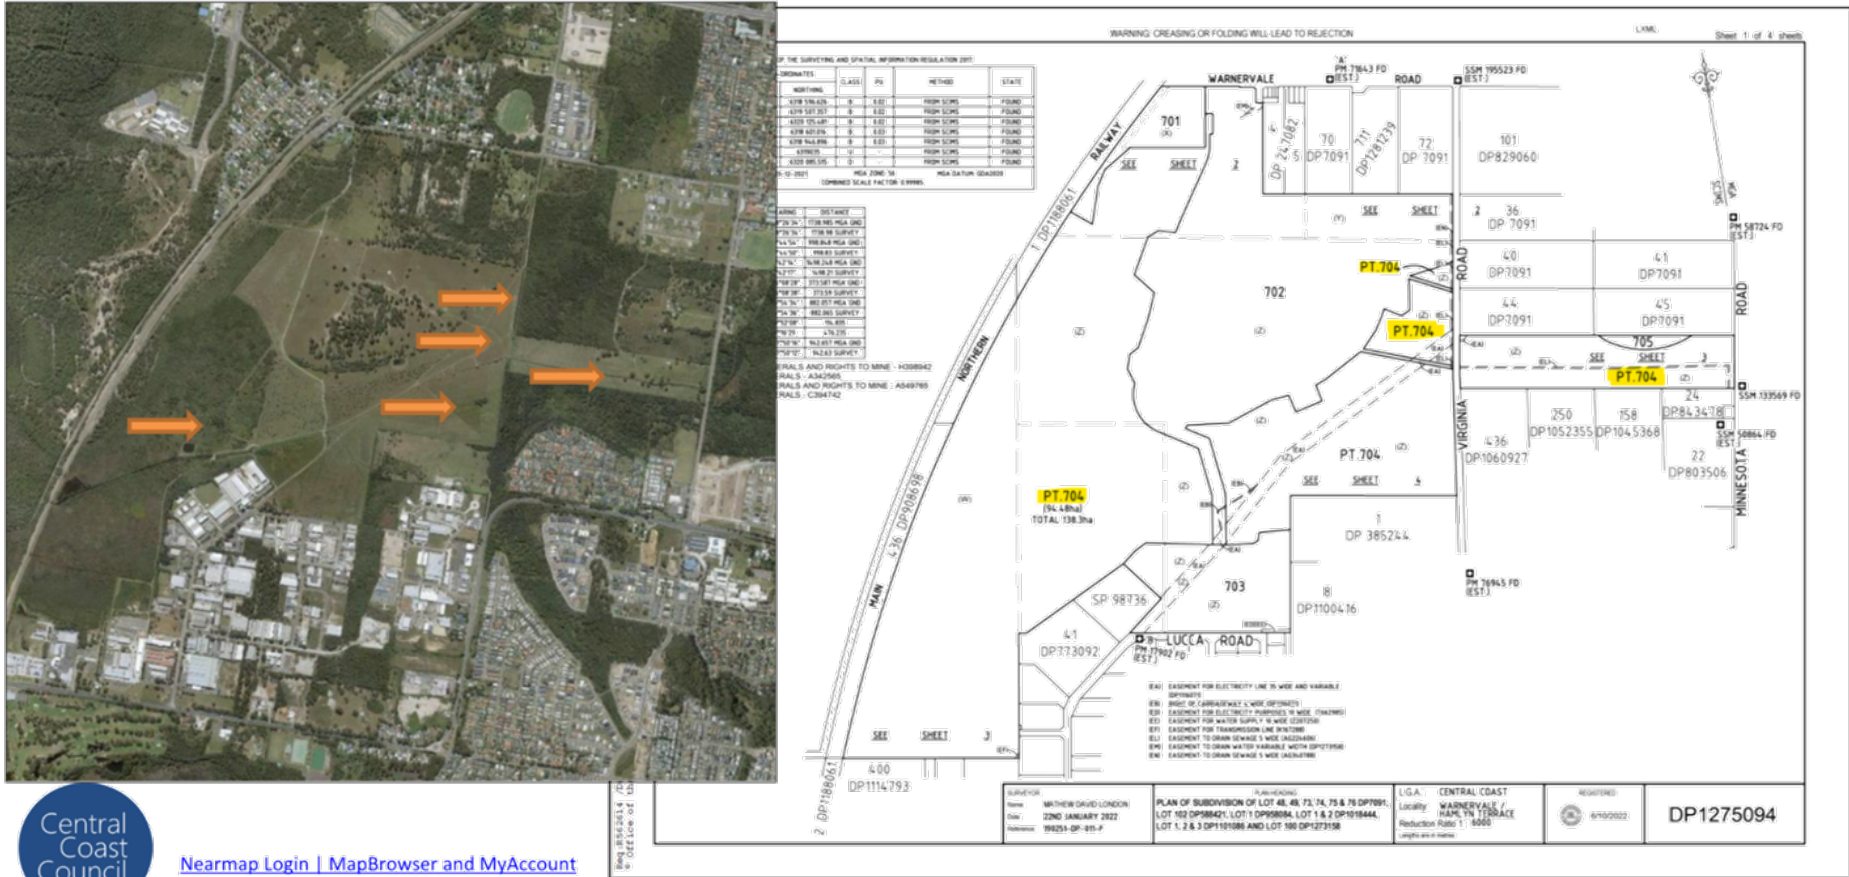

Stage 1 Land Transfer

- Location east of railway and north of Wyong racecourse and golf course
- Part of Porters Creek catchment

Location of Stage 1

[Nearmap Login](#) | [MapBrowser](#) and [MyAccount](#)

Values of the land

- Mapped as containing 3 endangered ecological communities
 - Swamp Sclerophyll Forest on Coastal Floodplains
 - Freshwater Wetlands on Coastal Floodplains
 - Lower Hunter Spotted Gum-Ironbark Forest
- Opportunity to de-channelise drain to reduce the rate of flow through the flood plain
- Potential for recreation on shared trails.

Item No: 2.4
Title: Update on visit to Wambina (Action 158)
Department: Environment and Planning

6 June 2023 Coastal Open Space System

Reference: F2018/00099-002 - D15662377
Author: Larry Melican, Section Manager Natural Assets and Biodiversity
Manager: Luke Sulkowski, Unit Manager Environmental Management
Executive: Alice Howe, Director Environment and Planning

Recommendation

That the information be noted.

Report purpose

To provide an update to the Coastal Open Space System (COSS) Committee about the inspection of Council land adjacent to and near Wambina Nature Reserve as part of the potential transfer of COSS land to the National Parks and Wildlife Service. This report relates to the COSS Action Item 158.

Executive Summary

Council resolved in part on 26 April 2022 that Council officers continue to work with NSW National Parks and Wildlife Service to progress the assessment of listed Council land for potential inclusion in the local national parks system.

Inspections of Council land were undertaken in the vicinity of Munmorah State Conservation Area on 14 September 2022; Bouddi National Park on 15 September 2022; and Wambina Nature Reserve on 29 March 2023.

Background

Council considered a Notice of Motion on 9 December 2019 titled Request from Proposals from Minister Kean. The correspondence from The Honourable Matt Kean MP, Minister for Energy and Environment, to Council dated 2 October 2019 included a request for advice on land acquisition proposals that would add value to the national parks system in your electorate.

Council resolved in relation to Item 8.9 Notice of Motion - Request from Proposals from Minister Kean:

2.4 Update on visit to Wambina (Action 158) (contd)

1350/19 That Council note the correspondence and commend The Hon Matt Kean MP, Minister for Energy and Environment, for his recent announcement of his intention to add lands to the National Parks Estate and calling for proposals.

1351/19 That Council note that staff have commenced a process of identifying potential land that could be included as part of a proposal.

1352/19 That Council request the Chief Executive Officer provide all Councillors with the opportunity to contribute to the process of identifying suitable lands.

1353/19 That Council request the Chief Executive Officer submit a proposal by the end of January, 2020.

A letter from Council to Minister Kean, dated 31 January 2020, provided a list of properties for consideration following the Councillor workshop on 14 January 2020. The letter included that the Councillor workshop identified 11 groups of properties across the Central Coast. Of the 11 groupings considered, six of the property groupings would be added to existing national parks while the other five property groups would require new national parks reserves to be established.

A letter from Minister Kean to Council, dated 15 March 2021, advised of the outcome of the initial assessment of the properties recommended by Council for potential transfer to NPWS. The Minister advised that he had requested NPWS to discuss the outcomes of the initial assessment with Council and develop comprehensive proposals for his consideration for the following nominations:

- Select lots adjoining Wambina Nature Reserve
- Select lots adjoining Bouddi National Park. The private lots nominated are not recommended for addition.
- One lot adjoining Munmorah State Conservation Area.

Council considered a report titled Potential Transfer of COSS Land to NPWS on 26 April 2022 and resolved:

- 1 *That Council officers continue to work with the NSW National Parks and Wildlife Service (NPWS) to progress the assessment of the Council land listed in Attachment 1 for potential inclusion in the local national parks system.*
- 2 *That Council authorise the Chief Executive Officer to write to the Director of the Conservation Branch of the NPWS to advise that Council land assessed as being suitable for inclusion in the national parks system will be transferred for no*

2.4 Update on visit to Wambina (Action 158) (contd)

monetary consideration subject to a further report on the outcomes of the assessment process being considered by Council.

- 3 *That Council authorise the Chief Executive Officer to write to the Director of the Conservation Branch of the NPWS to advise of Council's position that:
 - i. *legal costs associated with the potential transfer be covered by each party*
 - ii. *any costs associated with any subdivision or boundary realignments required would be equitably shared between the two parties.**
- 4 *That a report be brought back to Council identifying the Council-owned land parcels that are assessed as being suitable for potential transfer to the NPWS for inclusion in the local national park system.*
- 5 *That Council's Coastal Open Space System Committee provide formal advice on the proposal prior to it being brought back to Council.*

Current Status

Inspections of the land adjacent to Munmorah State Conservation Area and Bouddi National Park identified by former Minister Kean on 15 March 2021 were undertaken on 14 September 2022 and 15 September 2022 respectively.

Report

Inspection of the Council owned land adjacent to Wambina Nature Reserve was undertaken by representatives of NPWS, a representative of the COSS Committee and a representative of Council on 29 March 2023.

The properties inspected included:

Property Address	Lot/DP
385 Matcham Rd, MATCHAM	1/DP1087483
299 Matcham Rd, MATCHAM	8/DP262157
83 Tumbi Rd, WAMBERAL	101/DP866223
7B Longview Cl, WAMBERAL	133/DP1142189
6/360 Matcham Rd, MATCHAM	6/DP809300
2/358 Matcham Rd, MATCHAM	12/DP792810
27 Lea Ave, WAMBERAL	4/DP832164
67A Aldinga Dr, WAMBERAL	3/DP232333

NPWS will undertake an internal review of the land inspected before responding formally to Council.

Consultation

The COSS Committee has been provided regular updates on the property inspections. Representatives of the COSS Committee were invited to attend the property inspections. One member of the COSS Committee was involved in the inspection of the land adjacent to Wambina Nature Reserve.

Financial Considerations

At its meeting held 19 October 2020, Council resolved the following:

1108/20 That any motions put before Council for the remainder of this term of Council that have financial implications require the Chief Executive Officer to provide a report on how those additional costs will be met.

The following statement is provided in response to this resolution of Council.

There are no direct financial implications associated with this report.

Link to Community Strategic Plan

Theme 3: Green

Choose Focus Area

G-F1: Protect our rich environmental heritage by conserving beaches, waterways, bushland, wildlife corridors and inland areas, and the diversity of local native species.

Risk Management

No material risks have been identified relating to this information report.

Options

The recommendation is to note the report.
