

Document Review

Central Coast Green Grid

2020

DOCUMENT REVIEW

A review of strategic planning, studies and operational documents from internal stakeholders and external stakeholders was undertaken for documents prepared since 2005 or that are currently in development. At times older documents are included, being where they are still the principal planning document for an area or activity.

From these key documents is where the potential project list was drawn. In addition, some projects were also nominated at community and Council staff workshops.

The list is an evolving and dynamic store, that is supported by web-based software where documents are added and updated.

State Government Strategic Documents

- Department of Environment, Climate Change & Water NSW (2010) Tuggerah Lakes Estuary Modelling.
- Department of Planning, Industry and Environment NSW (2012) North Wyong Shire Structure Plan.
