# Liquid Trade Waste

Large or Industrial Dischargers Application Category 3 Classification C

# Definition

**Liquid trade waste (LTW)** is any discharge to a sewerage system other than domestic waste from a hand wash basin, shower, bath or toilet.

**Central Coast Council** is referred to as Council.

#### Introduction

This Fact Sheet is provided to assist you to treat and dispose of liquid trade waste in an efficient and approved manner.

For further information, please contact Council's Trade Waste Section on 4350 5555. For LTW application forms, refer to www.centralcoast.nsw.gov.au.

### Activities

Category 3 comprises high risk and large liquid trade waste dischargers where concurrence must be sought by the Council from the Director-General of the NSW Department of Industry Water.

High risk, large or industrial dischargers are those conducting an activity that:

- is of an industrial nature, and/or
- discharges volumes that exceed 20 kL/d

# Large dischargers include

	r to Council's <u>Liquid Trade Waste Poli</u> their allowable limits	<b>cy</b> for the Liquid Trade Waste Quality Standards, which lists pollutant
SUB	STANCES PROHIBITED FROM BEING D	NSCHARGED TO THE SEWERAGE SYSTEM
		being discharged to the sewerage system:
•	<u> </u>	les, pesticides, herbicides and substances of a similar nature and/or waster
arisir	ng from the preparation of these substar	•
•	organophosphorus pesticides and/o	or waste arising from the preparation of these substances
•	any substances liable to produce no	xious or poisonous vapours in the sewerage system
•	organic solvents and mineral oil	
•	any flammable or explosive substan	ces
•	discharges from 'Bulk Fuel Depots'	
•	chromate from cooling towers	
•	natural or synthetic resins, plastic m	onomers, synthetic adhesives, rubber and plastic emulsions
•	rain, surface, seepage or subsoil wat	er, unless specifically permitted
•	solid matter	
•	any substance assessed as not suita	ble to be discharged to the sewerage system
•	waste liquids that contain pollutants onal Wastewater Source Management Gu	at concentrations which inhibit the sewage treatment process – refer

• any other substances listed in a relevant regulation.

Signature of Property Owner/s

Owner's authorisation to making the application is mandatory as per Section 78 of the Local Government Act 1993

Please note that the owner of the property will be billed for water supply, sewerage and liquid trade waste services provided and it is the owner's responsibility to pay such fees and charges within the period specified. The owner may arrange to recover such fees and charges through the lease agreement between the owner and the occupier.

The applicant should be aware that approval of this application does not constitute a guarantee of any future approval of a variation to the approval. This will be dependent on the available capacity of the sewerage system at that time and any future approval must not be assumed. However, alerting the Council to the applicant's future plans and proposals may assist the Council in planning future sewage management and / or infrastructure additions / modifications.

Signature of occupier / applicant

## Application to Discharge Liquid Trade Wastes into Council's Sewerage System Additional Details Required For Discharger Category C

The following pages are to be used to include additional information required from businesses that wish to discharge Concurrence Classification C liquid trade wastes to the sewerage system. Please include all details as requested (if insufficient space attach as clearly labelled appendices), and make sure you read the section on substances that must not be discharged to the sewerage system.

Name of processes generating liquid trade waste

Type and quantity of raw materials processed

Description of waste:

- List of all expected pollutants including substances contained in wash down detergents, boiler and cooling water and other sources
- Expected maximum and average concentrations of pollutants
- Sample analysis results of the proposed waste.

Note: The sample analysis tests shall be carried out by a NATA approved laboratory with accreditation for analysis of the nominated pollutants in the application or a laboratory acceptable to NOW.

#### Acceptable means of sample analysis data collection:

- Sample analysis results from a similar existing process
- Collection of the proposed waste from a trial pre-treatment plant
- Stand alone pre-treatment manufacturer's waste quality expectations
- Configured pre-treatment consultant's calculations based on experience of a similar installation

#### Attach details and supporting documentation of data collection method.

When detailing the nominated pollutants, where there is no possibility of discharge to the sewerage system

Pollutant	Acceptance Guideline Limits
Aluminium (AL)	100 mg/L
Ammonia (as N)	50 mg/L
Arsenic (As)	1 mg/L *
Barium (Ba)	10 mg/L *
Biological Oxygen Demand (BOD <sub>5</sub> )	600 mg/L
Biocides	Nil
Boron (B)	25 mg/L *
Bromine (Br <sub>2</sub> )	5 mg/L
Cadmium (Cd)	2 mg/L *
Chlorinated Hydrocarbons	Nil
Chlorinated Phenolics	Nil
Chloride	1000 mg/L
Chlorine (Cl <sub>2</sub> )	10 mg/L
Chromate	Nil
Chromium (cr) (Total) #	5 mg/L *
Cobalt (Co)	5 mg/L *
COD	< 3x BOD
Copper (Cu)	5 mg/L *
Cyanide	5 mg/L
Flammable / Explosive substances	Nil
Fluoride (F)	20 mg/L
Formaldehyde	50 mg/L
Grease / Oil	100 mg/L
Herbicides / Weedicides / Fungicides	Nil
Iron (Fe)	100 mg/L
Lead (Pb)	2 mg/L *
Lithium (Li)	5 mg/L *
Methylene Blue Active Substances (MBAS)	50 mg/L
Manganese (Mn)	10 mg/L *
Mercury (Hg)	0.02
Molybdenum (Mo)	10 mg/L *
Nickel (Ni)	5 mg/L *
Nitrogen (N) (Total Kjeldahl Nitrogen)	100 mg/L
Pentachlorophenol	Nil
Pesticides – General	Nil
Pesticides – Organo-chlorine	Nil
Pesticides – Organophosphate	Nil
РСВ	Nil
Petroleum Hydrocarbons (non-flammable)	20 mg/L
РН	7.0 - 9.0
Phenolic Compounds	Nil
Phosphorus (Total)	10 mg/L

Polynuclear Aromatic Hydrocarbons (PAH)	Nil
Pollutant	Acceptance Guideline Limits
Selenium (Se)	5 mg/L *
Silver (Ag)	2 mg/L *
Sulphate (SO <sub>4</sub> )	500 mg/L
Sulphide (S)	1 mg/L
Sulphite (SO <sub>3</sub> )	15 mg/L
Suspended Solids (SS or NFR)	300 mg/L
Temperature	38°C maximum
Tin (Sn)	5 mg/L *
Total Dissolved Solids	1000 mg/L
Zinc (Zn)	5 mg/L *
Other Substances	Nil refer notes

#### Notes to Quality Standards and Excluded Substances

Flow Rate - The maximum daily and instantaneous rate of discharge (kL/h or L/s) is set on the available capacity of the sewer. Large dischargers are required to provide a balancing tank to even out the load on the sewage treatment works.

Colour - No visible colour when the waste is diluted to the equivalent dilution afforded by domestic sewage flow.

Radioactive substances - The discharge must comply with the Radiation Control Act 1900.

Chromium # - Where hexavalent chromium ( $Cr^{6+}$ ) is present in the process water, pre-treatment will be required to reduce it to the trivalent state (Cr<sup>3+</sup>), prior to discharge into the sewer.

No discrete oil, fat or grease may be discharged.

Hazardous wastes are totally excluded.

Animal matter (including carcasses but not including human waste), wool, hair, grease, dust, ashes, cinders, soil, rubbish, filth, oil, salt, mud, medical waste, sand, gravel, garbage, offal, vegetable or fruit parings, rags, house refuse, steam or solid matter is prohibited.

Any flammable, volatile solvent or explosive substance are excluded.

Wastes arising from the preparation of pesticides, organo-chlorine weedicides, fungicides, herbicides and substances of a similar nature are not permitted.

Any substance liable to produce noxious or poisonous vapours in the sewerage system is excluded.

Organic solvents and mineral oils are excluded.

Natural or synthetic resins, plastic monomers, synthetic adhesives and rubber plastic emulsions are not permitted.

Waste liquids that contain pollutants at concentrations which inhibit the sewerage treatment process are not permitted – refer to Guidelines for Sewerage Systems: Acceptance of Trade Waste (Industrial Waste) (ARMCANZ/ANZECC, 1994).

The discharge of Hexavalent Chromium (from Chromate compounds) used as corrosion inhibitors or organometallic algicides is not permitted.

Infectious or contagious solid or liquid waste is excluded.

Rain, roof, surface, flood, seepage and / or subsoil waters are not permitted.

Any substance likely to cause injury to personnel employed in the sewerage system or the environment for which the sewage effluent is discharged is not permitted.

Any other matter determined by Council to be of an environmental health or other risk to Council's sewerage system is prohibited.

Substances or mixtures of substances that are not miscible with water are not permitted in the sewer system.

Quality Standards for substances other than those listed in above table in Schedule A are to be determined by Council.

\* Total Heavy Metals is the sum of all metals in the waste stream excluding Aluminium, Iron, Manganese and Molybdenum. This shall not exceed 30 mg/L.

The quality of trade waste from some low risk commercial activities in Classification A will exceed guideline limits in this Table. As a higher level of pre-treatment is not cost-effective, such waste is acceptable if the discharger installs and properly operates and maintains the required pre-treatment equipment.

BOD concentration up to 600 mg/L and in some cases higher concentration for low mass loadings may be acceptable if the treatment works has sufficient capacity and odour will not be a problem.

Details of management arrangement of waste streams / wastes that are not permitted or not intended to be discharged to the sewerage
system.

#### The maximum daily and instantaneous rate of discharge (kL/h or L/s) is set on the available capacity of the sewer. Large dischargers are required to provide a balancing tank to even out the load on the sewage treatment works.

Peak periods of discharge during the day			
Type of discharge			
Batch Flow	Intermittent Flow	Contin	uous Flow
Detail any special circumstances applicable to t	the discharge, for example:		
Seasonal discharges			
Large differences between average a			
<ul> <li>Variations to flow, which avoid peak</li> <li>Retention of discharges for extended</li> </ul>			
	, periods		
Does the proposed installation contain open a		YES	L NO
If YES, please give details and attach stormwate	er drainage plan for the site.		

Stormwater is prohibited from being discharged into the Council's sewerage system. The capacity for such flows is not provided in the sewerage system. Therefore, council does not generally accept the discharge of stormwater

#### to the sewerage system.

The discharge of limited quantities of first flush water from sealed liquid trade waste generating areas will be considered where roofing cannot be provided because of safety or other important considerations.

Reasons why the area cannot be fully or partially roofed and bunded to exclude stormwater						
The dimer	nsions of the area u	nder consideration				
Is the ope	n area sealed?	YES	NO NO	Estimated	ed volume of the stormwater discharge	
Informatic	on on a first flush sy	vstem, if proposed				
Measures	proposed for diver	ting stormwater awa	y from the liquid tr	ade waste	generating area	
Report on	other stormwater	management option	s considered and w	hy they are	e not feasible	
Identify th	ne water supply sou	rce				
	Bore / groundwa	ter / on-site dam / v	vatercourse		Town water	
	Recycled / reuse	water			Any water supply meter being installed	
Flow meas	surement location a	and proposed flow n	easurement to sew	ver (attach o	details of flow measurement installed / propos	ed)
Applicatio	n to be accompani	ed by two copies of	plans showing:			
<ul> <li>Details and location of all processes, tanks, pits and apparatus associated with the generation of industrial waste</li> <li>Details of the proposed liquid waste treatment processes</li> <li>Details of pipes, floor drainage used to convey the effluent</li> <li>A full schematic layout of the proposed / existing waste pre-treatment facilities for liquid trade waste prior to discharge to the sewerage system</li> </ul>						
•	Capacity / dimensi pumps, etc		truction and lining,	, operation	n and maintenance of all pits, tanks, dosing syst	
• Details of the integrity of the pH correction system (diversion system, recording, alarms - location, fail-safe, tamper-proof)						

Proposed cleaning schedule of pre-treatment equipment and contractor					
Substance	Qty	Storage liquid / solid	Location	Bunding	
NOTE: Attach Material Safety Data Sheets prepared in accordance with the National Code of Practice (NOHSC:2011) for chemicals to be used and are likely to be contained in the waste effluent					
Any proposed plans for future expansion? (If Yes, give details on a separate attachment)           YES         NO
