1. INTRODUCTION

1.1 BACKGROUND

In March 2018, Bitzios Consulting (Bitzios) was engaged by Central Coast Council (Council) to prepare an integrated parking strategy for the Local Government Area (LGA).

The Central Coast Parking Strategy has been prepared in two (2) parts, including:

- Part 1: Short-Term Gosford Central Business District (CBD) Strategy; and
- Part 2: Short, Medium and Long-Term Central Coast Strategy.

The Part 1 report was completed in June 2018. The Part 2 report is expected to be completed in June 2019.

In addition to the above, Bitzios was engaged to obtain parking data at key 'Focus Areas' along the coastline to better understand peak parking demands and potential shortfalls during a typical holiday period (Part 3).

1.2 Scope of Works

The agreed scope of works for the Part 3 report is summarised below:

- Item 1: undertake a spot survey for each Focus Area during the middle of the day (i.e. 10:00AM to 2:00PM) on Saturday 12th January 2019 to record the number of parked vehicles on-street and within public off-street car parking areas;
- Item 2: estimate future parking demands and shortfalls in the short (2023), medium (2028) and long (2038) terms based on forecast population and tourism growth;
- Item 3: prepare thematic maps showing parking supply and demand for the existing situation (2019) and forecast future parking demands in the short (2023), medium (2028) and long (2038) terms; and
- Item 4: summarise key findings in a brief 'standalone' report (this document).

1.3 FOCUS AREAS

The focus areas for the Part 3 report are listed below:

- Focus Area #7: The Entrance;
- Focus Area #8: Terrigal;
- Focus Area #10: Umina;
- Focus Area #11: Ettalong;
- Focus Area #12: Patonga;
- Focus Area #13: Pearl Beach;
- Focus Area #14: Macmasters;
- Focus Area #15: Copacabana;
- Focus Area #16: Avoca.
- Focus Area #17: North Avoca:
- Focus Area #18: Wamberal:
- Focus Area #19: Forresters Beach:
- Focus Area #20: Bateau Bay;
- Focus Area #21: Shelly Beach;
- Focus Area #22: Norah Head;
- Focus Area #23: Budgewoi Peninsula;
- Focus Area #24: Budgewoi Township;
- Focus Area #25: Toukley; and
- Focus Area #26: Toowoon Bay.

It is noted that Focus Area #1 (Gosford), #2 (Lisarow), #3 (Ourimbah), #4 (Tuggerah), #5 (Wyong), #6 (Warnervale) and #9 (Woy Woy) were included in Part 2 only. Focus Area #7 (The Entrance) and #8 (Terrigal) were included in both Part 2 and 3.

The location of each focus area relevant to the Part 3 report is indicatively illustrated on Figure 1.1.

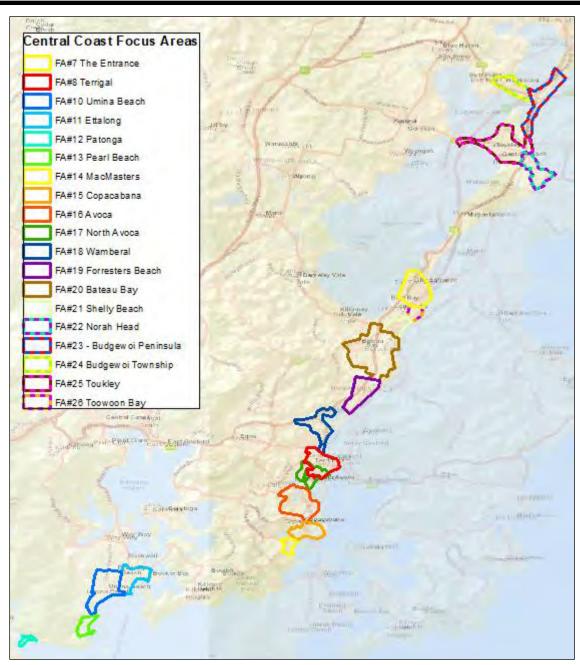

Figure 1.1: Focus Area Overview Map

1.4 LIMITATIONS

This document is a data report, not a strategy report.

This document does however identify locations where additional parking may be required to accommodate existing and future demands during peak tourist times, based on forecast population and tourism growth.

2. OVERVIEW OF PARKING SURVEY DATA

Table 2.1 provides an overview of the parking occupancy results from the spot surveys undertaken on 12th January 2019 between 10:00AM and 2:00PM.

A copy of the raw parking survey data is included at Appendix A.

Thematic maps for each Focus Area are included in Appendix B to T respectively.

Figure 2.1 ranks each Focus Area based on the surveyed parking demands.

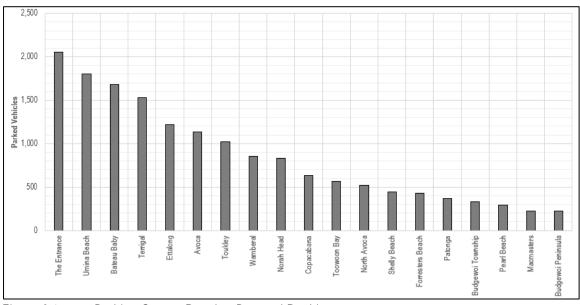

Figure 2.1: Parking Survey Results: Demand Ranking

Figure 2.2 ranks each Focus Area based on the surveyed occupancy rate.

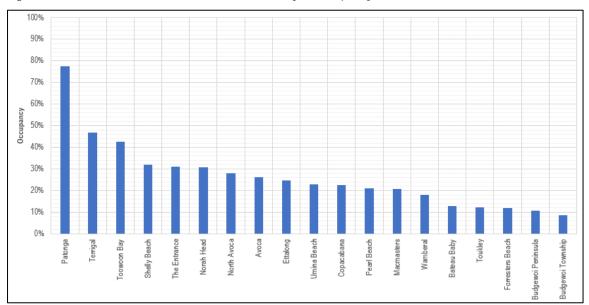

Figure 2.2: Parking Survey Results: Occupancy Ranking

Key points to note:

- four (4) Focus Areas recorded parking demands greater than 1,500 vehicles, including:
 - The Entrance:
 - Umina Beach;
 - Bateau Bay; and
 - Terrigal
- eight (8) Focus Areas recorded parking demands between 500 and 1,500 vehicles, including:
 - Ettalong;
 - Avoca;
 - Toukley;
 - Wamberal;
 - Norah Head;
 - Copacabana;
 - Toowoon Bay; and
 - North Avoca.
- the remaining seven (7) Focus Areas recorded parking demands less than 500 vehicles;
- Patonga recorded the highest occupancy level of 78%;
- Toowoon Bay and Terrigal recorded moderately high occupancy levels of approximately 43-47%; and
- approximately 70% of Focus Areas recorded a parking occupancy level less than 32%.

3. PARKING DEMAND GROWTH ASSUMPTIONS

3.1 Population & Visitor Growth

Table 3.1 provides a summary of the Central Coast LGA population forecast between 2016 and 2036.

Table 3.4 summarises the resultant 'resident to visitor' ratio on the Central Coast in 2016 and 2036.

Table 3.4: Resident to Visitor Ratio – Central Coast LGA

Component	2016	2036
Total Visitors (Day)	21,617	30,478
Total Resident Population	335,309	414,615
% Visitors	6.06%	6.85%
% Residents	93.94%	93.15%

Key points to note:

- the Central Coast LGA population is predicted to increase at a rate of 1.18% p.a.;
- approximately 60% of the Focus Areas are predicated to have negligible growth (<0.25% p.a.);
- the most significant growth is predicted for The Entrance (2.70% p.a.) and Toukley (1.14% p.a.);
- on any given day, approximately 6% of people within the Central Coast LGA are visitors; and
- visitor demands on the Central Coast have historically increased at a rate of 2.05% p.a.

3.2 Parking Demand Growth Factors

Table 3.5 provides a summary of the adopted 'growth factors' for each focus area in the short (2023), medium (2028) and long term (2038), based on a combination of forecast population growth and visitor growth.

Table 3.5: Parking Growth Factors – Focus Area

10	Focus Area	Residents		Visitor		Combined	Growth Factors		
ID		Rate	Proportion	Rate	Proportion	Growth Rate (p.a.)	2023	2028	2038
7	The Entrance	2.70%	93.15	2.05%	6.85	2.65%	111%	124%	150%
8	Terrigal	-0.04%	93.15	2.05%	6.85	0.10%	100%	101%	102%
10	Umina Beach	0.13%	93.15	2.05%	6.85	0.26%	101%	102%	105%

21	Shelly Beach	0.61%	93.15	2.05%	6.85	0.70%	103%	106%	113%
22	Norah Head	-0.04%	93.15	2.05%	6.85	0.11%	100%	101%	102%
23	Budgewoi Peninsula	0.53%	93.15	2.05%	6.85	0.63%	103%	106%	112%
24	Budgewoi Township	0.53%	93.15	2.05%	6.85	0.63%	103%	106%	112%
25	Toukley	1.14%	93.15	2.05%	6.85	1.20%	105%	111%	123%
26	Toowoon Bay	0.61%	93.15	2.05%	6.85	0.70%	103%	106%	113%

It is noted that limited growth is forecast for all Focus Areas except The Entrance, Bateau Bay, and Toukley.

4.1.6 Summary of Results

Table 4.1 provides a summary of the surveyed and forecast future parking demands for Focus Area #7.

Table 4.1: Focus Area #7: Summary of Results

Area	Supply (spaces)	Surveyed Demands 2019		Forecast Demands						
				2023		2028		2038		
		vehs	%	vehs	%	vehs	%	vehs	%	
Focus Area	6,605	2,052	31%	2,257	34%	2,511	38%	3,158	48%	
Tourist Hotspot	4,064	1,417	35%	1,561	38%	1,732	43%	2,175	54%	
C1: Memorial Park	145	145	100%	160	110%	179	123%	218	150%	
C2: Entrance Road	66	66	100%	73	111%	82	124%	99	150%	
C3: Public Car Park	491	193	39%	214	44%	238	48%	291	59%	

Key points to note are:

- moderate increases in parking demands are likely to occur based on population and tourism growth;
- there are significant demands for parking in proximity to the eastern foreshore;
- there is no spare capacity at the Memorial Park and Entrance Road car parks; and
- there is significant spare capacity within The Entrance Public Car Park (> 200 spaces available).

Based on the above, additional parking supply is not warranted within The Entrance.

As outlined in the Part 2 report, it is recommended that Council investigates opportunities to maximises the utilisation of the existing The Entrance Public Car Park which is located on the fringe of the commercial core, and less than 200m walking distance from the foreshore.

Council could also potentially reduce on-street time limits within the commercial core during summer months by way of customised parking signage.

4.2.6 Summary of Results

Table 4.2 provides a summary of the surveyed and forecast future parking demands for Focus Area #8.

Table 4.2: Focus Area #8: Summary of Results

Area		Surveyed Demands		Forecast Demands							
	Supply (spaces)	2019		2023		202	28	2038			
		vehs	%	vehs	%	vehs	%	vehs	%		
Focus Area	3,262	1,530	47%	1,534	47%	1,537	47%	1,546	47%		
Tourist Hotspot	1,308	828	63%	829	63%	832	64%	838	64%		
C1: Wilson Road	425	212	50%	212	50%	214	50%	217	51%		
C2: Surf Club	73	61	84%	61	84%	61	84%	62	85%		
C3: Haven	320	208	65%	209	65%	210	66%	212	66%		

Key points to note are:

- limited increases in parking demands are likely to occur based on population and tourism growth;
- there is a high demand for on-street parking in proximity to the foreshore;
- there is limited / no spare on-street capacity within the 'tourist hotspot' zone; and
- there is significant spare capacity within the Wilson Road Parking Station (> 200 spaces available).

Based on the above, additional parking is not warranted within Terrigal.

As outlined in the Central Coast Parking Strategy, it is recommended that Council investigates opportunities to maximises the utilisation of the existing Wilson Road Car Park which is located on the fringe of the commercial core, and less than 250m walking distance from the foreshore. This could be achieved via improved digital wayfinding signage, marketing, and improved pedestrian safety.

Council could also potentially reduce on-street time limits within the commercial core during summer months by way of customised parking signage.

C4: Surf Club (Umina)	147	142	97%	143	97%	145	99%	149	101%		

Key points to note are:

- negligible increases in parking demands are likely to occur based on population and tourism growth;
- there are moderate demands for parking in proximity to the southern foreshore; and
- there is no spare capacity at the Ocean Beach and Umina Surf Club car parks.

Based on the above, additional parking in proximity to the Umina Surf Life Saving Club may be required to accommodate existing and future holiday peak period demands, or temporary signage may be needed to direct visitors to available parking a little further away from peak demand areas.

Tourist Hotspot	607	437	72%	444	73%	469	77%	503	83%	

Key points to note are:

- there are moderate demands for parking in proximity to the foreshore (The Esplanade); and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking in proximity to the foreshore area (The Esplanade) may be required to accommodate existing and future peak holiday demands, or temporary signage may be needed to direct visitors to available parking a little further away from peak demand areas.

C1: Boat Ramp Car Park	82	62	76%	63	77%	63	77%	65	79%	

Key points to note are:

- there are moderate demands for parking in proximity to the foreshore and at the boat ramp; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking is not warranted within Patonga. However, it is recommended that Council formalise the Boat Ramp Car Park (i.e. line markings etc.) to maximising parking capacity.

Key points to note:

- there are limited demands for parking in proximity to the foreshore; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking is not warranted within Pearl Beach.

Tourist Hotspot	325	154	47%	155	48%	155	48%	159	49%

Key points to note:

- there are limited demands for parking in proximity to the foreshore; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking is not warranted within Copacabana.

C5: Vale Ave Car Park	89	81	91%	82	92%	83	93%	85	96%		

Key points to note are:

- there are significant demands for parking in proximity to the foreshore; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking in proximity to the foreshore area (Ficus Avenue) may be required to accommodate existing and future demands in peak holiday periods or either temporary or permanent wayfinding signage used to direct visitors to available parking a little further away.

C2: Surf Club South	13	13	100%	13	100%	13	100%	13	100%		

Key points to note are:

- there are moderate demands for parking in proximity to the foreshore;
- there are moderate demands for parking at the surf club; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking is not warranted within North Avoca. The parking issues at the surf club are synonymous with parking at surf clubs in peak summer periods and would not in themselves warrant substantial investments in additional parking supply. Improved management and wayfinding measures to nearby parking areas may be alternative ways of addressing these issues.

Key points to note are:

- there are moderate demands for parking in proximity to the foreshore;
- there are reasonably high demands for parking at the Wamberal Surf Life Saving Club; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking in proximity to the Wamberal Surf Life Saving Club may be required to accommodate existing and future demands in peak holiday periods, or improved wayfinding provided for available parking a little further away.

Key points to note are:

- there are limited demands for parking in proximity to the foreshore; and
- there are negligible increases in parking demands based on population and tourism growth.

Based on the above, additional parking is not warranted within Bateau Bay.

The Bateau Bay Beach car park is heavily used in peak holiday periods as expected, and it would not ordinarily be warranted to increase parking capacity based on peak holiday season needs only.

North Shelly Beach Dog Park	85	85	100%	87	102%	90	106%	96	113%		

Key points to note are:

- there are moderately high demands for parking in proximity to the foreshore;
- there are moderately high demands for parking in proximity to the North Shelly Beach Dog Park; and
- there are small increases in parking demands based on population and tourism growth.

Based on the above, additional parking in proximity to the foreshore area (Shelly Beach, and North Shelly Beach Dog Park) may be required to accommodate existing and future demands. Alternative parking areas are located at a significant walking distance to the ultimate beach destinations. As an interim measure, consideration could be given to providing 'drop-off' areas near the beach with drivers then returning to the west to find a car park a little further away (in peak summer months).

Key points to note are:

- there are moderately high demands for parking in proximity to Cabbage Tree Bay Boat Road;
- there are significant demands for parking in proximity to the Soldiers Beach Surf Life Saving Club; and
- there are negligible increases in parking demands based on population and tourism growth.

Based on the above, additional parking may be required in proximity to the Soldiers Beach Surf Life Saving Club to accommodate existing and future demands. Also, some peak holiday period signage may assist to alert drivers on approach to beach car parking that the car parks are full.

Key points to note are:

- there are limited demands for parking in proximity to the foreshore;
- whilst there are some high occupancy levels near the village centre, there is sufficient parking within a short walk to the village; and
- negligible increases in parking demands are likely to occur based on population and tourism growth.

Based on the above, additional parking is not warranted within Toukley.

Key points to note are:

- there are moderately high demands for parking in proximity to the foreshore;
- there are moderately high demands for parking in proximity to Swadling Park and the Toowoon Bay Surf Life Saving Club; and
- there are negligible increases in parking demands based on population and tourism growth.

Based on the above, additional parking may be required in proximity to Swadling Park and the Toowoon Bay Surf Life Saving Club in peak summer periods or improved wayfinding signage could be used to direct drivers to available parking a little further away.

5. SUMMARY OF KEY FINDINGS

Table 5.1 provides a summary of the key findings from this study.

Table 5.1: Summary of Key Findings by Focus Area

ID	Focus Area	Existing Holiday Period Parking Demands	Expected Growth in Population & Tourism to 2038	Scale of Future Parking Challenges	Key Findings
7	The Entrance	high	high	moderate	No additional parking required. However, Council could maximise utilisation of The Entrance Public Car Park through digital wayfinding signage, marketing, and improved safety.
