San Remo District
Development Contributions Plan

April 2020
# Contents

**Summary Schedules**

1. **Administration and Operation of this Plan**
   - 1.1 Name of this Plan
   - 1.2 Area to which this Plan Applies
   - 1.3 Purpose of this Plan
   - 1.4 Commencement of this Plan
   - 1.5 Relationship with other Plans and Policies
   - 1.6 Definitions
   - 1.7 What Types of Development will be Levied?
   - 1.8 When is the Contribution Payable?
   - 1.9 Complying Development and Obligation of Accredited Certifiers
   - 1.10 Construction Certificates and Obligation of Accredited Certifiers
   - 1.11 Deferred and Periodic Payments
   - 1.12 Can the Contribution be Settled “In-Kind”?
   - 1.13 Exemptions
   - 1.14 Review of Contribution Rates
   - 1.15 How are Contributions Adjusted at the Time of Payment?
   - 1.16 Are there Allowances for Existing Development?
   - 1.17 Pooling of Contributions
   - 1.18 Savings and Transitional Arrangements
   - 1.19 Timing of Works
   - 1.20 Dedication / Transfer of Land
   - 1.21 Revision of Plan

2. **Urban Characteristics and Population**
   - 2.1 Expected Future Development
   - 2.2 Population Increase
   - 2.3 Occupancy Rates
   - 2.4 Meeting Population Needs

3. **Community Infrastructure and Contributions**
   - 3.1 Roadworks and Traffic Management
     - 3.1.1 Nexus between Development and Demand
     - 3.1.2 Apportionment of Costs
     - 3.1.3 Calculation of the Contribution Rate

Refer to Section 3 for details of how these rates are calculated.
1 Administration and Operation of this Plan

1.1 Name of this Plan

This plan is called the San Remo District Development Contributions Plan.

1.2 Area to which this Plan Applies

This plan applies to land within San Remo Social Planning District, as shown in the figure titled San Remo District.

1.3 Purpose of this Plan

The purpose of this plan is to:

- provide an administrative framework under which specific public facilities strategies may be implemented and coordinated
- ensure that adequate public facilities are provided for as part of any new development
- authorise Council to impose conditions under section 7.11 (s7.11) of the Environmental Planning and Assessment (“EP&A”) Act 1979 when granting consent to development on land to which this plan applies
- provide a comprehensive strategy for the assessment, collection, expenditure accounting and review of development contributions on an equitable basis
- ensure that the existing community is not burdened by the provision of public amenities and public services required as a result of future development, and
- enable Council to be both publicly and financially accountable in its assessment and administration of the development contributions plan

1.4 Commencement of this Plan

This plan has been prepared pursuant to the provisions of s7.11 of the EP&A Act and Part 4 of the EP&A Regulation and takes effect from the date on which public notice was published, pursuant to clause 31(4) of the EP&A Regulation.

1.5 Relationship with other Plans and Policies

This Plan repeals all previous versions of the San Remo District Development Contributions Plan.

This plan should be read in conjunction with Wyong Local Environmental Plan 2013, relevant Development Control Plan Chapters, Contributions Plans, Council’s Management Plan and Council’s Codes and Policies.

This Plan replaces any requirements and details related to Section 7.11 Contributions that exist within any Development Control Plan Chapter prepared by Council for this area. This Plan takes precedence over any of Council’s Codes and Policies where there are any inconsistencies in relation to Section 7.11 Contributions.
Other contributions plans may also apply to development covered by this plan (for example, the Shire Wide Contributions Plan).

**Contributions Plan Area**
1.6 Definitions

For the purposes of this plan, a “Development Unit (DU)” is defined as being equivalent to a three bedroom residential dwelling. Where development other than a three bedroom dwelling is proposed, an equivalent contribution factor based on a proportion of DU will need to be calculated in accordance with Table 2.

For the purposes of this plan, “Net Developable Area (NDA)” is expressed in hectares and is the actual area on which a development could be sited. NDA excludes land for trunk drainage, roads, open space, community facilities, noise buffers, undevelopable lands and certain major non-residential land uses.

Secondary dwelling means a self-contained dwelling that:

a is established in conjunction with another dwelling (the principal dwelling), and

b is on the same lot of land as the principal dwelling, and

c is located within, or is attached to, or is separate from, the principal dwelling, and

1.7 What Types of Development will be Levied?

Unless otherwise stated within the various schemes, the contribution rates contained within this plan will be levied upon any type of development or subdivision of land within the relevant catchment.

Table 2 summarises the types of development which will be required to contribute towards the various contribution categories.

1.8 When is the Contribution Payable?

A contribution must be paid to the Council at the time specified in the condition that imposes the contribution. If no such time is specified, the timing of the payment of the contribution is as follows:

- development applications involving subdivision – prior to release of subdivision certificates
- development applications involving building works – prior to the release of the construction certificate
- development applications where no building approval is required – at the time of development consent

In regard to the latter case, the applicant may make a cash payment of contributions prior to issue of the development consent or alternatively lodge a suitable bank guarantee, also prior to issue of the consent. This bank guarantee will be called up upon commencement of the consent.

Note: √ contribution is applicable to development
1.9 **Complying Development and Obligation of Accredited Certifiers**

In accordance with Section 7.21(1) of the EP&A Act:

1. Accredited certifiers must in issuing a complying development certificate impose a condition under Section 7.11 that requires the payment of monetary contributions calculated in accordance with this development contributions plan. The condition of consent shall also require the payment to be made prior to the commencement of works where building works are involved or prior to the commencement of use where no building works are involved.

2. This plan authorises accredited certifiers to impose such a condition. The condition must include a notation that the contribution amounts are indexed on a quarterly basis.

3. The amount of contributions and timing of payment shall be strictly in accordance with the provisions of this contributions plan.

It is the responsibility of accredited certifiers to:

- accurately calculate the quantum of contributions or alternatively seek advice and assistance directly from Council; and
- apply the Section 7.11 condition correctly.

1.10 **Construction Certificates and Obligation of Accredited Certifiers**

In accordance with Clause 146 of the EP&A Regulation, a certifying authority must not issue a construction certificate for building work or subdivision work under a development consent unless it has verified that each condition requiring the payment of monetary contributions has been satisfied.

In particular, the certifier must ensure that the applicant provides a receipt(s) confirming that contributions have been fully paid and copies of such receipts must be included with copies of the certified plans provided to the Council in accordance with clause 142(2) of the EP&A Regulation. Failure to follow this procedure may render such a certificate invalid.

The only exceptions to the requirement are where a works in kind or dedication of land has been agreed by Council. In such cases, Council will issue a letter confirming that an alternative payment method has been agreed with the developer.

1.11 **Deferred and Periodic Payments**

Council will generally not accept deferred or periodic payment of contributions required under this plan.

Council has, however formulated a policy in relation to the negotiation and preparation of planning agreements which provides for the consideration of deferred or periodic payments.

Consideration of requests for deferral of contributions will involve careful consideration of community/public infrastructure delivery and financial implications for Council.
1.12 Can the Contribution be Settled “In-Kind”? 

Council may accept an offer by the developer to provide an “in-kind” contribution (i.e. the developer completes part or all of work/s identified in this plan) in lieu of the developer satisfying its obligations under this plan.

Council may accept such alternatives in the following circumstances:

- the developer making a formal application to carry out the works, and
- the standard of the works is to Council’s full satisfaction

The value of the works to be substituted will be the value assigned to it under this plan. If there is a dispute between Council and the developer over the value of the works, the developer must provide to Council for consideration documented evidence of the value by an independently certified Quantity Surveyor who is registered with the Australian Institute of Quantity Surveyors or a person who can demonstrate equivalent qualifications.

Council will require the developer to enter into a written Works In Kind Agreement for the provision of the works prior to the commencement of the works.

Acceptance of any such alternative is at the sole discretion of Council. Council may review the valuation of works and may seek the services of an independent person to verify their value. In these cases, all costs and expenses borne by Council in determining the value of the works or land will be paid by the developer.

Offsetting of contributions will not be automatic. Applications will be considered on their merits. Water and sewerage contributions (under the Water Management Act) will not be offset against contributions determined in accordance with this plan; rather they will be offset against the contributions determined in accordance with the relevant Development Servicing Plan. Offsetting of contributions, if considered appropriate, will also only be permitted to occur within the same contributions plan area and against the same category (e.g. dedication of open space land can only be used to offset contributions for open space land and/or works).

Council offset contributions where such a situation is likely to lead to a delay in the provision of land or facilities to the detriment of the incoming population.

Where the value of a particular work in kind exceeds the contribution due for that work, this excess value may (subject to Council’s concurrence) form a credit to the developer. The timing for the repayment of the credit is to be included in the Works In Kind Agreement. Unless otherwise agreed, the credit will be repaid once all of the following criteria have been met:

- all of the developer’s land within the area serviced by a contributions plan covering that area has been developed and all relevant contributions have been offset against the credit value
- 75% of the areas benefiting from the credited land have contributed to the scheme
- sufficient funds exist in the fund ensuring the refund will not impact on Council’s ability to carry out works contained on its rolling works programme

It may be feasible to provide temporary measures to service initial stages of development in lieu of constructing major works up front. Such proposals will need to be assessed at the time of application and provision of such works will be the sole responsibility and cost of the particular developer, except where they form part of the final work identified in this Plan, in which case that part will be treated as works in kind.
The cost of temporary works not recognised as works in kind cannot be offset against any other contributions required under this plan.

1.13 Exemptions

Council does not have a policy that exempts any development from payment of monetary contributions levied under this plan, except in the following circumstances:

- the Crown as a private developer (e.g. Landcom subdivision of land) – contributions will apply in the same manner as they would for a private development
- developments provided by the Crown which provide a public service (e.g. school, court house, hospital) – contributions will be assessed based on the demand for community infrastructure
- in accordance with any direction issued by the Minister under Section 7.17 of the EP&A Act

1.14 Review of Contribution Rates

To ensure that the value of contributions are not eroded over time by movements in the Consumer Price Index, land value changes, the capital costs of administration of this plan or through changes in the costs of studies used to support this plan, Council will review the contribution rates.

The contribution rates will be reviewed by reference to the following specific indices: roadworks and traffic management facilities, drainage works, open space and recreational facilities, water quality land and works, community facilities and administration by the Consumer Price Index, Australia for Sydney as published by the Australian Bureau of Statistics (Source: ABS 6401.0 Table 1).

In accordance with clause 32(3)(b) of the EP&A Regulation, the following sets out the means that Council will make changes to the rates set out in this plan. For changes to the Consumer Price Index, the contribution rates within this plan will be reviewed on a quarterly basis in accordance with the following formula:

\[ \$C_A + (\$C_A \times (\text{Current Index} – \text{Base Index})) ÷ \text{Base Index} \]

Where:

- \$C_A is the contribution at the time of adoption of this plan expressed in dollars
- \text{Current Index} is the Consumer Price Index, Australia for Sydney as published by the Australian Bureau of Statistics available at the time of review of the contribution rate
- \text{Base Index} is the Consumer Price Index, Australia for Sydney as published by the Australian Bureau of Statistics used in the preparation of this plan which is 94.4 (December 2009)

Note: In the event that the Current Consumer Price Index is less than the previous Consumer Price Index, the Current Consumer Price Index shall be taken as not less than the previous Consumer Price Index.
1.15 **How are Contributions Adjusted at the Time of Payment?**

The contributions stated in development consents are calculated on the basis of the s7.11 contribution rates determined in accordance with this plan. If the contributions are not paid within the quarter in which consent is granted, the contributions payable will be adjusted and the amount payable will be calculated on the basis of the contribution rates that are applicable at time of payment in the following manner:

\[
$ C_P = (C_{DC} + (C_{DC} \times (C_Q - C_C))) ÷ C_C
\]

Where:

- $ C_P$ is the amount of the contribution calculated at the time of payment
- $ C_{DC}$ is the amount of the original contribution as set out in the development consent
- $ C_Q$ is the contribution rate applicable at the time of payment
- $ C_C$ is the contribution rate applicable at the time of the original consent

The current contribution rates are published by Council and are available from Council offices or Council’s web page.

1.16 **Are there Allowances for Existing Development?**

Contributions will be levied according to the estimated increase in demand. An amount equivalent to the contribution attributable to any existing (or approved) development on the site of a proposed new development will be allowed for in the calculation of contributions. For example:

- dwelling houses and single vacant allotments – 1.00 DU
- other dwellings including secondary dwellings:
  - 4 bedroom units – 1.28 DU
  - 3 bedroom units – 1.00 DU
  - 2 bedroom units – 0.73 DU
  - 1 bedroom units – 0.52 DU

Where a development does not fall within any of the items noted above, Council will determine the credit on the basis of the likely demand that the existing development will create.
1.17 Pooling of Contributions

To provide a strategy for the orderly delivery of the infrastructure, this plan authorises monetary community infrastructure contributions paid:

- for different purposes in accordance with the conditions of various development consents authorised by this plan, and
- for different purposes under any other contributions plan approved by the Council to be pooled and applied progressively for those purposes.

The priorities for the expenditure of pooled monetary community infrastructure contributions under this plan are the priorities for works as set out in the relevant works schedules (Appendix B).

In deciding whether to pool and progressively apply contributions funds, Council is satisfied that this action will not unreasonably prejudice the carrying into effect, within a reasonable time, of the purposes for which the money was originally paid.

1.18 Savings and Transitional Arrangements

A development application which has been submitted prior to the adoption of this plan but not determined shall be determined in accordance with the provisions of the plan which applied at the date of determination of the application.

1.19 Timing of Works

Council is generally not able to bankroll proposed works required as a consequence of development proposed under this Plan and will only be able to provide works and services when sufficient funds have been provided by way of contributions.

Priority spending of contributions may, however, be directed to particular items identified in this Plan and this has been considered in formulating works schedules. Actual timing of the works will be dependent on development patterns and funds available from Section 7.11 contributions.

1.20 Dedication / Transfer of Land

Subject to prior agreement with Council, land may be dedicated/transferred in lieu of making a contribution towards the acquisition of land and in some cases, Council may require dedication/transfer of particular land as a condition of consent. Council will only accept land dedication/transfer where that land is of a suitable nature for the purpose for which it is being dedicated/transfered. All land to be dedicated/transfered to Council is to be free of any improvements, structures or other impediments which would restrict or hinder its future use or development for the purposes for which it is being acquired, unless otherwise agreed by Council. The land is also to be dedicated/transfered in an appropriate state, free of any refuse, contamination, or the like, unless otherwise agreed by Council.
1.21 Revision of Plan

This Plan may be revised if the extent or nature of the proposed development varies and these variations lead to a change in the demand for public services and amenities.

Costings of works identified in this Plan are based on preliminary and detailed designs and changes to cost estimates as a result of detailed design may also necessitate a revision to this Plan. Table 3 outlines the amendments to this Plan.

2 Urban Characteristics and Population

2.1 Expected Future Development

This plan relates to demand for public facilities and services created by residential and industrial development within the San Remo District of the Central Coast Local Government Area.

It is forecast that a further 152 lots will be developed within this plan area. These development assumptions are based on an assessment of the areas, known rezoning proposals and historic rates of development.

In addition, an allowance has been given to further subdivision of existing zoned properties within each area based on the size of the property and the characteristics of surrounding development. Details of the proposed development potential within the area are shown in Table 4.

<td>828</td>
</tr>
</tbody>
</table>

2.2 Population Increase

The population increase for this plan area is anticipated to be 828. This is based on an occupancy rate of 2.5 persons per dwelling unit (DU).

2.3 Occupancy Rates

Occupancy rates for this Contributions Plan are based on the average occupancy rates for the urban release areas of Blue Haven, Buff Point, Colongra, Doyalson, Halekulani and San Remo areas. This data is from the Census conducted in 2006.

Council will continue to monitor the occupancy rates during the life of this plan and will amend this plan to align with the updated occupancy rate as required. The current occupancy rate of 2.5 persons per dwelling unit (DU) will be applied to determine the contribution rate for a residential development. The applicable DU factor will then be applied to determine the contribution rate for other types of development.

2.4 Meeting Population Needs

The incoming population will be distributed across the suburbs of Blue Haven and San Remo. This additional population will create increased demand for a range of services including roadworks and traffic management, drainage and water quality, open space facilities and community facilities.
3 Community Infrastructure and Contributions

3.1 Roadworks and Traffic Management

This section considers the road and intersection requirements generated as a result of the development in the area of this Plan. There are two schemes:

- Blue Haven and San Remo Residential Areas, and
- Doyalson Industrial Area

Details of the schemes are found below. The areas subject to the schemes are shown in Figures 2 and 3 plus the Highview Street residential area and medium density development in San Remo.

The approach to establishing road and intersection requirements for this area has been:

- identify existing road hierarchy and traffic flows
- predict future road hierarchy and traffic flows generated by existing development or existing zoned areas for which no contributions may be sought when development does proceed, but excluding the proposed development
- identify road and intersection improvements necessary to cater for these predicted flows
- predict future road hierarchy and traffic flows generated by all future development including the proposed development
- identify additional road and intersection improvements necessary to cater for these predicted flows, and
- where necessary, apportion costs of improvements based on traffic flows

3.1.1 Nexus between Development and Demand

Blue Haven / San Remo Residential Areas

The road and intersection requirements are based on a traffic report completed by Pak Poy and Kneebone and a technical report completed by Council’s Strategic Planning Department (Report No 462, December 1994).

These identified that upgrading of certain intersections would be required to cater for the proposed development and that certain works within the development (eg. drainage works, internal roundabouts, etc.) should form part of an overall contribution scheme. The proposed works are described below with further details shown in Table 5:

- four way traffic signals at the Pacific Highway/Goorama Avenue intersection - incorporating a grade-separated pedestrian link across Pacific Highway
- a distributor road link between Pacific Highway and the internal road system of the development area. This link has a 30 metre road reserve accommodating a 19 metre five-lane divided carriageway
- a single lane roundabout at the link road/collector road intersection
- single lane roundabouts at sites 1, 3 and 4 on the collector road as shown in Figure 2
- T intersection works, Give Way at Site 2
- half road construction fronting community, recreational and open space facilities – (Sites A to G in Figure 2)
- cycleways - 2.5 metre wide concrete, shared pedestrian/cycleways
  - adjacent to collector road near Roundabout No 4 and community facilities
  - adjacent to collector road and link road from the intersection of Colorado Drive and Timbarra Crescent to Pacific Highway
- land required for cycleway construction
- land required for link road identified above
- culvert and minor channel augmentation near Wallarah Creek next to Allambee Avenue

The developers of the San Remo release area had, several years ago, dedicated land for and contributed to the cost of the extension of Goorama Avenue and upgrading of the intersection of Goorama Avenue and the Pacific Highway. This had been previously recognised as fulfilling their requirements for road and intersection improvements in the area.

**Doyalson Industrial Area**

The road and intersection requirements are based on Technical Report No 465 completed by Council's Strategic Planning Department.

The proposed works are described below with further details and cost estimates shown in Table 6 and Figure 3.

A Type ‘C’ intersection at the junction of Scenic Drive and David Street, Doyalson, involving the following:

- construction of a new AC pavement outside the area of the existing pavement
- reconstruction of the existing pavement
- construction of bitumen sealed shoulders

It is identified that the upgrading of the intersection is required to cater for the proposed development in the Doyalson Industrial Area as shown in Figure 3.
3.1.2 Apportionment of Costs

Blue Haven / San Remo

Table 5 shows details of apportionment of costs on the basis of traffic generated.

Table 5 Apportionment of Road Schemes – Blue Haven / San Remo

* Existing development has not generated extra demand on the existing intersection.

3.1.3 Calculation of the Contribution Rate

Roads – Blue Haven (Urban Release Area and Medium Density)

\[
\text{Contribution} = 93.68\% \times \text{roundabout} + 2.28\% \times \text{roundabout} + 100\% \times \text{other items} \\
= 93.68\% \times 3,005,843 + 2.28\% \times 3,005,843 + 1,118,662 \\
= 2,815,873 + 68,533 + 1,118,662 \\
= $4,003,069 \\
\]

\[
\text{Contribution Rate} = \frac{4,003,069}{1,956 \text{ DU}} \\
= \$2,047 \text{ per DU} \\
\]
3.1.4 Program for Works and Funding

Blue Haven / San Remo

All roadworks and traffic management facilities required under this plan have been delivered. However, Funds for these roadworks and traffic management facilities are yet to be fully recouped.

Doyalson Industrial Area

The actual provision of the intersection works will be required when traffic volumes turning out of David Street reach 60 vehicles per hour. This is expected to occur when the area is about 70% developed.

Drainage – Blue Haven Urban Release Area Only

Contribution Rate $33,443 ÷ 104 NDA
= $321 per NDA
= $21 per DU (NDA ÷ 15.4 lots per hectare)

Roads – San Remo Medium Density Development and Highview Street Residential Area

Contribution = 4.04% x roundabout
= 4.04% x 3,005,843
= $121,436

Contribution Rate $121,436 ÷ 112 DU
= $1,084 per DU

Roads – Doyalson Industrial Area - Scenic Drive / David Street Intersection

Contribution Rate $1,900,000 ÷ 7.744 hectares
= $245,351 per NDA

Figure 3  Industrial Park, Doyalson
3.2 Water Quality

This section considers the water quality requirements generated as a result of the development in the area shown in Figure 4. The total Net Developable Area (NDA) of the scheme is 22.59 hectares.

Based on the minimum desirable area for a facility with a waterway area of 3% of the catchment, 1 hectare of land is required for the facility. The cost associated with the land for the facility is $200,000.

Construction of the water quality facility totalled $608,689 (indexed to April 2010).

3.2.1 Nexus between Development and Demand

The scheme covers a drainage catchment within the Blue Haven Urban Release Area which does not have any stormwater treatment facilities controlling run off into the wetland adjacent to Wallarah Creek.

3.2.2 Apportionment of Costs

The water quality facility at the location shown on Figure 4 has already been provided. Its purpose was to provide stormwater treatment to match the controls in the adjoining catchments to the west. The cost of providing this facility is to be apportioned across the entire area of the scheme. Council will meet the apportionment of cost attributable to existing development. Table 7 shows a breakdown of land ownership of the subject catchment.

Table 7 Water Quality Apportionment of Cost

<table>
<thead>
<tr>

<td>2.22</td>
</tr>
<tr>
<td>TOTAL</td>
<td>22.59</td>
</tr>
</tbody>
</table>

3.2.3 Calculation of the Contribution Rate

The contribution for this facility is calculated as follows:

Total cost of land associated with the facility

\[
\text{Contribution Rate} = \frac{200,000}{22.59} = \frac{8,853}{\text{per NDA}} = \frac{575}{\text{per DU (NDA ÷ 15.4 lots per hectare)}}
\]

Total cost of works associated with the facility

\[
\text{Contribution Rate} = \frac{608,689}{22.59} = \frac{26,945}{\text{per NDA}} = \frac{1,750}{\text{per DU (NDA ÷ 15.4 lots per hectare)}}
\]

FIGURE 4
3.3 Open Space and Recreational Facilities

Council’s goal for open space is to implement an open space system which conserves a sustainable natural character for the area and provides a variety of settings for recreation to meet identified community needs.

Council requires that local open space for residential areas be provided at the standard of 3.0ha per 1,000 persons.

There are various categories of open space within area as follows:

- Regional Open Space which includes Semi Natural open space, Regional Parks and Field/Courts
- District Open Space which includes Large Parks, Fields and Courts
- Local Open Space which includes Local Parks
- Ancillary Open Space which is open space that has a dual use such as a drainage corridor and passive open space or a visual use

Council’s Open Space Principles Plan (2005a) provides minimum areas for the different types of open space, however there is flexibility where it can be proven that the open space purpose can be achieved. The minimum area for each of the types is outlined in Table 8.

Table 8 Minimum Open Space Areas

</tr>
<tr>
<td>Court</td>
<td>1.0</td>
</tr>
<tr>
<td>Small Park</td>
<td>0.5</td>
</tr>
</tbody>
</table>

3.3.1 Nexus between Development and Demand

It is proposed to levy contributions based on the standard provision of 3.0ha per 1,000 persons. Therefore, 1.995ha of open space are required to meet the demands of the new population growth of 665 persons. Embellishment will improve the quality of the open space and recreational facilities to allow additional use.

The Principles Plan also provides how open space should be proportioned against the different types of open space. Table 9 outlines this proportion and the amount of the different types of open space for this plan area.
Table 9  Apportionment Open Space Areas

<td><strong>100</strong></td>
<td><strong>2.48</strong></td>
</tr>
</tbody>
</table>

The Open space Principles Plan sets out the requirements for location of open space and recreational facilities such as locating fields and courts adjacent to each other, locating small parks within 500m of all consolidated residential areas and co-location of facilities wherever possible.

Facilities have been located in areas to meet the needs of the new residential development and taking advantage of existing facilities. Contributions are levied on a per DU basis so that only the open space required to meet the demands of the new population is levied. Council will continue to identify facilities that will meet the needs of the future population. These projects will be identified through the revision of this Section 7.11 Development Contributions Plan and/or Council’s annual Management Plan.

A detailed Schedule of Works is provided in Appendix B.

Council has undertaken various open space reports such as the Local Parks Resource Report for Action Plan 2005, Local Parks Strategy 2005, Recreation Facilities Strategy 2009 and the Local Parks Action Plan 2005 which outline the required actions and priorities for open space projects. These reports have been used to identify the priority of the proposed projects. Contribution funds for the open space projects will be pooled to allow the open space projects to be undertaken in accordance with prioritisation as outlined in the Schedule of Works (Appendix B).

### 3.3.2 Open Space Land Requirements

Assessment of existing open space land shows that there is an excess of land for the existing population and that there is no significant shortfall due to the requirements generated by the future development. Further, there is no concentrated location for this future development for which specific open space sites can be provided. Hence, there will be no requirement for land due to the future development.

### 3.3.3 Apportionment of Costs

Future development predicted within the District will be spread throughout the area and so all future development will be required to share the costs for open space embellishment on a proportional basis.
3.3.4 Calculation of the Contribution Rate

Embellishment costs have been determined based on the average costs for previous works undertaken by Council as follows:

**Local Parks - $51/m² (average of the following examples)**

- Owl Park by AVJ developments indexed to March 2010 - $208,759 for 5,000m² park = $42/m²
- Mataram Road small park by Council indexed to March 2010 - $238,199 for 3,992m² park = $60/m²

**Courts - $144/m²**

Value of courts in Warnervale contributions plan indexed to March 2010 - $4,492,217 for 31,200m² = $144/m²

**Fields - $67/m² (average of the following examples)**

- Pat Morley Oval indexed to March 2010 - $2,154,619 for 92,000m² = $23/m²
- Jubilee Oval indexed to March 2010 - $3,699,664 for 34,644m² = $107/m²
- Wadalba Sporting Fields indexed to October 2009 - $6,627,347 for 95,525m² = $69/m²

**Semi Natural Areas - $9/m²**

Table 10 provides a summary of the current rates for embellishment of open space based on the above.

<table>
<thead>
<tr>
<th>Open Space Facility</th>
<th>Embellishment Costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local Parks</td>
<td>$51/m²</td>
</tr>
<tr>
<td>Courts</td>
<td>$144/m²</td>
</tr>
<tr>
<td>Fields</td>
<td>$67/m²</td>
</tr>
<tr>
<td>Semi-Natural</td>
<td>$9/m²</td>
</tr>
</tbody>
</table>

The above cost estimates are applied to the area requirements to determine the overall embellishment costs for open space within the San Remo District.

<table>
<thead>

<tr>
<td><strong>TOTAL</strong></td>
<td></td>
<td></td>
<td><strong>$1,175,304</strong></td>
</tr>
</tbody>
</table>
Contributions for Open Space and Recreational Facilities will be fully apportioned to future development. The contribution rate is determined as follows (all rates are determined to the nearest dollar):

\[ C = \frac{\text{Facility Costs}}{\text{Demand}} \]

Where:

- **C** is the contribution rate per DU
- **Facility Costs** is the total Open Space and Recreational Facilities costs
- **Demand** is the total DU predicted in the District

**Local Parks**

Contribution Rate \[= \frac{442,420}{331 \text{ DU}}\]  
= \$1,336 per DU

**Courts**

Contribution Rate \[= \frac{178,851}{331 \text{ DU}}\]  
= \$540 per DU

**Sporting Fields**

Contribution Rate \[= \frac{500,244}{331 \text{ DU}}\]  
= \$1,510 per DU

**Semi Natural**

Contribution Rate \[= \frac{53,790}{331 \text{ DU}}\]  
= \$162 per DU

**Combined**  
Contribution Rate \[= \frac{3,549}{331 \text{ DU}}\]  
= \$3,549 per DU
3.4 Community Facilities

Council has prepared Guidelines for the Planning and Provision of Community Facilities in Wyong Shire (2000, updated in July 2002) which determines the requirements to specify the scope and level of community need for facilities and in identifying location, siting, design and other criteria.

Council provides a network of community facilities as a focus for community activities and as venues for the delivery of community support services and programs. These facilities function as both specific purpose and multi-function community facilities including libraries, public halls, youth, child care and senior citizens centres and general purpose neighbourhood/community centres. They incorporate spaces and rooms for large public meetings/private functions, group activities, workshops, interviews/counselling services, office accommodation and the provision of a diverse range of health, education, welfare and leisure services and programs.

The Guidelines adopt a flexible approach through the construction of multi-purpose facilities and the co-location of services. This also includes the embellishment of existing facilities where feasible to increase the functionality of halls and centres and develop more multi-purpose facilities. The development of multi-purpose facilities presents the opportunity to establish a major focus for community services delivery through the co-location of a number of services in the one facility. This flexible approach also encourages joint venture projects with community based and voluntary sector organisations as well as schools.

3.4.1 Nexus between Development and Demand

It is not proposed to construct any new facilities within the District at this time. Rather, an assessment of the usage patterns and catchments of existing facilities has resulted in a recommendation to embellish existing facilities to ensure that they can cater for the demand created by the future population.

Council’s Guidelines recommend that an additional 0.314m² per person of community floor space is provided. This amount of floor space has been determined based on average sizes for community facilities and the standard provision for each type of facility. An additional 209m² of community floor space is required to meet the needs of the additional 828 persons within the plan area.

The required area of 209m² is then calculated by the cost per square metre to provide additional community facilities. The cost of $3,776 per m² has been used. This cost has been derived by Council based on the detailed design and development of a number of community facilities as outlined below:

- Blue Haven Community Centre Construction Cost $4,627,898 for 1,092m² = $4,238 per m²
- Southern Lakes Community Centre Construction Cost $1,932,174 for 583m² = $3,314 per m²
- Average $3,776 per m²

An amount of $981,796 will be apportioned to future development to embellish existing community centres and halls to meet the additional demand.

The District provides a number of existing community halls and centres. It is proposed that these existing facilities will be embellished to increase the capacity to meet the demand from the new population growth. Council will continue to identify projects that will meet the needs of the future population. These projects will be identified through the revision of this development contributions plan and/or Council’s annual Management Plan.

Contribution funds for the Community Facilities will be pooled to allow projects to be undertaken in accordance with the prioritisation as outlined in the Schedule of Works (Appendix B).
3.4.2 Community Facilities Land Requirements

Assessment of existing community facilities that there is an excess of land for the existing population and that there is no significant shortfall due to the requirements generated by the future development. Further, there is no concentrated location for this future development for which specific community facilities sites can be provided. Hence, there will be no requirement for land due to the future development.

3.4.3 Calculation of the Contribution Rate

The contribution rate is determined as follows (all rates are determined to the nearest dollar):

\[
C = \frac{\text{Facility Cost}}{\text{Demand}}
\]

Where:

- \(C\) is the contribution rate per DU
- \(\text{Facility Cost}\) is the total Community Facilities costs
- \(\text{Demand}\) is the total DU predicted in the District

Contribution Rate  \(= \frac{981,796}{331} \approx 3\) DU
\(= \$2,967\ per\ DU\)
3.5 Administration

The costs to be recovered under this plan include:

- the salary and operating costs over a 5 year period for the coordination of the development contribution process
- a salary component over a five year period for other Council officers who are directly involved in preparing plans and carrying out other development contribution functions
- on-costs, vehicles and award increases over a 5-year period

Table 12 provides details of the administration costs to be recovered under this plan based on the apportioned number of DUs identified in Table 13.

3.5.1 Nexus between Development and Demand

The effective administration and management of the development contribution process is crucial to achieving the objectives of the Section 7.11 process. To ensure that contribution funds are managed effectively and that services and facilities are provided within a reasonable time, Council has a number of staff that are directly involved in the contribution process. The administration and management costs to be recovered under this plan only partly cover the full costs of the process; however, the Department of Planning Industry and Environment recognises that these costs are a legitimate cost able to be recovered under Section 7.11. The administration costs will be included in all of Council’s contributions plans. Based on the coverage of, and time taken to administer, this contributions plan, 2.5 percent of the total administration costs are included (as shown in Table 12).

3.5.2 Apportionment of Costs

The apportioned estimated cost of administering development contributions is assessed as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Total Salary &amp; On Costs for 5 year Period</th>
<th>Percentage to be Recovered by S7.11</th>
<th>Amount to be Recovered across All Contribution Plans</th>
<th>Amount to be Recovered by this Plan Based on 2.5% of Total Costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Development Contributions Staff</td>

</tr>
</thead>
<tbody>
<tr>
<td>5,789</td>
<td>2.5%</td>
<td>145</td>
</tr>
</tbody>
</table>

3.5.3 Calculation of the Contribution Rate

Contributions will be collected from residential and non residential development in San Remo District toward the cost of administering and managing development contributions.

The monetary contribution per DU is calculated as follows:

\[ C = \frac{AC(CPA)}{DU} \]

Where:

- \( C \) is the contribution rate per DU
- \( AC(CPA) \) is 2.5% of the estimated cost of administering development contributions in the former Wyong Shire area over the life of this plan (i.e. $66,216 rounded)
- \( DU \) is 2.5% of the total DUs predicted across the former Wyong Shire area over an example 5 year period, as shown in Table 13. (i.e. 145 DU)

Contribution Rate = \( \frac{66,216}{145} \) = $458 per DU (rounded)
