A. POLICY SUMMARY

A1 This policy defines the circumstances under which Council will provide concessions on increases in user charges resulting from water used by home haemodialysis and peritoneal patients. This policy also defines how such concessions are calculated.

B. POLICY BACKGROUND

B1 Wyong Council is a water supply authority under the WMA – s285 and Schedule 3.

B2 Council applies user charges for water supply services based on volumes of water supplied to properties as registered on the water meters attached to each property – s310

B3 The WMA provides that property owners are liable for payment of any charges levied under those acts - s316

B4 The WMA or regulations do not require Council to provide concessions or reductions in charges for water registered through meters but subsequently used for haemodialysis and in the hygiene requirements process associated peritoneal dialysis.

B5 Council recognises that water usage for this purpose is necessary in order that patients undergoing kidney dialysis can receive essential life supporting treatment and enjoy the benefits that home dialysis treatment provides.

B6 Council wishes to provide financial relief for customers that incur increases in user charges accounts resulting from home dialysis treatment.

C. DEFINITIONS

C1 **Council** means the elected representatives, Councillors, who form the governing body of Wyong Shire Council and the organisation responsible for the administration of Council affairs and operations and the implementation of Council policy and strategies.

C2 **Daily Average Usage** of water calculated as the volume of water supplied in a meter reading period expressed in Kilolitres (KI) divided by the number of days in the same meter reading period.

C3 **Meter Reading period** means the period of time between readings of a water meter.

C4 **The LGA** means the *Local Government Act 1993*.

C5 **The Regulations** means the *Water Management (General) Regulation 2011*.

C6 **The WMA** means the *Water Management Act 2000*.

C7 **Volume of water supplied** means the quantity of water supplied to a property as measured through the water meter(s) attached to the property.
